LEONARD COATES
Nursery Company

MORGAN HILL
CALIFORNIA
COATES FRENCH PRUNES are the result of 30 years of observation, study and experiment. We have no less than 10 varieties in bearing and propagate from the best of these tested, "pedigreed" sorts. The study that Mr. Leonard Coates has given to this matter, the connections we have established in testing varieties in different parts of the State and the large number of trees we have in bearing, enables us to offer to planters nursery trees that will be real money makers.

Coates (French) Prune No. 1418 (actual size)
The Coates (French) prune orchard that has caused so much interest, as it proves their commercial value to the most critical observer. Leonard Coates has here demonstrated his idea of 30 years ago that, 'all French prunes are not alike.'

FRUIT TREE DEPARTMENT

PRICES are understood net at nursery. Five of one variety furnished at 10 rate, 50 at 100 rate, and 300 at 1000 rate.

PACKING is done in a careful manner and trees are shipped successfully as far as Australia. A charge is made to cover cost of material used.

COMPLAINTS. All claims for shortage, or any other possible mistakes, must be made within two days after receipt of stock or they cannot be allowed. Carefully examine trees or plants upon arrival. If anything is wrong, notify us at once; adjustments, if any are needed, are made at this time.

GUARANTEE OF GENUINENESS. While every care is taken to sell stock true to name and description, mistakes may sometimes occur, in which case, on proper proof, being presented, we shall be ready to refund the amount paid or will replace such trees or other stock.

It is mutually understood and agreed to between purchaser and ourselves that such guarantee of genuineness shall in no case make us liable for any sum greater than the original amount paid for any stock that may prove to be untrue. If this is not agreed to by purchaser, trees or plants must be returned at once.

We have temporarily cut down our usual long list of choice assorted varieties for home use, on account of the great demand for our COATES (FRENCH) PRUNE, No. 1418, and the limited amount of seedlings available. Also some varieties are completely sold out before this catalogue is ready for the printer.

Coates (French) prunes have been studied closely for many years. The above photo shows the group of experts who examined the Coates test orchards and fruit on August 27, 1920. Lower row, left to right: Robt. Westcott, M. McDonald, Dr. F. M. Coleman, N. Ballard, Leonard Coates, Prof. R. H. Taylor, A. L. Ellis, W. S. Killingsworth, M. C. Ellis, Prof. A. D. Shamel, G. W. Pennebaker. Upper Row: Mrs. Shaw, Mrs. Coates, H. G. Keesling, Elton R. Shaw, Ronald H. Coates, A. D. Beardsley, H. C. Benedict, Leonard H. Day, Prof. L. E. Scott, (Prof. W. L. Howard and L. R. Cody had to leave before the photo was taken).

ASPARAGUS, Conover's Colossal, and Palmetto, 50c per 10, $3.50 per 100.

RUBARB, Crimson Winter, strong transplants 40c ea., $3.50 per 10.

RUBARB, Linnaeus, 25c ea. $2.50 per 10.
Lath houses full of ornamental trees and plants.

DECIDUOUS SHADE TREES

ACER campestris. ENGLISH MAPLE. Very ornamental; dark green foliage retained late in the fall. Succeeds well in California. 4-8 ft. M.
a. macrophyllum. BROAD LEAVED MAPLE. Native of California. Street, avenue or shade tree. It becomes a handsome tree of large proportions with a stately stem often three feet or more in diameter with branches to the height of twenty feet, its spread of limbs shading an area from seventy-five to one hundred feet across. 4-6 ft. L.
a. rubrum. SCARLET MAPLE. Native of eastern states. Does well in California. 2-3 ft. L.
a. saccharum. SUGAR MAPLE. 2-3 ft. L.
a. saccharinum. SILVER MAPLE. Native of eastern states. Rapid grower in California, and well adapted for a street or avenue tree. 4-8 ft. L.
AESCULUS Californicum. BUCKEYE. 1-3 ft. L.
a. hippocastanum. HORSE CHESTNUT. 3-5 ft. L.
AMYGDALUS davidiana. FLOWERING ALMOND. Dbl. white, p.nk and single pink. 1-3 ft. C.
CARYA olivaeformis. PECAN. Makes one of the finest shade trees; tall and symmetrical. Bears only in warmer parts of the state. 2-4 ft. L.
CATALPA bungei. Tree of moderate growth, forming a round, compact head; leaves large. Very useful for a formal avenue or drive- way. Top grafted on c. speciosa. Sizes 5-6 ft. N.
c. speciosa. WESTERN CATALPA. Strong growing tree, with large, roundish leaves, and panicules of white, spotted, fragrant flrs. Very handsome tree when in bloom. A fine specimen of this tree is growing by our office. 1-8 ft. L.
CELTIS occidentalis. HACKBERRY or NETTLE TREE. Small spreading tree, well adapted for a lawn; leaves rather light green, flrs. small, berries orange-red. 3-8 ft. M.
CERCIS canadensis. JUDAS TREE, RED BUD. Small spreading tree, covered in the spring with deep crimson flrs. before leaves appear. Its early blooming makes it desirable in every home lot; or grouping in larger grounds would be very effective. 1-8 ft. M.
c. occidentalis. JUDAS TREE, RED BUD. The native Californian variety is dwarfed in habit, and therefore better adapted to smaller gardens. Mixed with c. canadensis it would make a most effective grouping. 1-6 ft. M.
CHILOPSIS linearis. DESERT WILLOW. Large tubular flrs., cream colored, spotted or striped purple. 1-3 ft. M.
CLERODENDRON trichotomum. A very hardy shrub or small tree. Flrs. bright blue. 2-3 ft. M.
CORYLUS californica. HAZEL NUT. 2-3 ft. C.
CRATAEGUS. Double scarlet, white and single red thorn. 3-6 ft. M.
FRAXINUS. The ash is a favorite ornamental tree, with long compound leaves and inconspicuous flrs.
f. americana. AMERICAN ASH, WHITE ASH. Tall tree, succeeding well wherever there is sufficient root moisture. Valuable trees, which should be largely planted. 4-8 ft. L.
f. velutina. **ARIZONA ASH.** A shapely growing tree, particularly recommended for alkaline or saline soils where most other trees are a failure. Withstands drought well. 4-8 ft. L.

**GYMNOCLADUS canadensis.** **COFFEE BEAN, KENTUCKY COFFEE TREE.** 1-5 ft. L.

**JUGLANS californica.** **CALIFORNIA BLACK WALNUT.** One of the best and most vigorous shade or avenue trees. 4-6 ft. L.

**KOELREUTERIA paniculata.** **PRUNUS.** **PERSIAN CHERRY.** Tree of moderate growth, forming well rounded head; leaves dark glossy green, pinnate. Flrs. in large terminal panicles, bright yellow, the large bladdery-like crimson seed pods appearing before all the blossoms have fallen. The effect is striking, the tree being exceedingly handsome in leaf, fr., and seed, and a beautiful variegated tree. 2-4 ft. L.

**LABURNUM vulgare.** **GOLDEN CHAIN.** 4-8 ft. L.

**LARIX decidua.** **EUROPEAN LARCH.** 5-6 ft. N.

**LIRIODENDRON tulipifera.** **TULIP Poplar.** Very handsome tree with large tulip-shaped greenish-yellow flrs. 4-5 ft. L.

**MAGNOLIA** purpurea. 6-8 ft. P.

**MELIA azedarach.** **TEXAS UMBRELLA TREE.** 4-6 ft. M.

**MORUS nigra.** **BLACK PERSIAN MULBERRY.** Leaves large, pointed, and very large, and has a very tart rich quality. This tree should be in every garden. Many prefer the fruit to blackberries, and it bears for a long season. 4-6 ft. N.

**MORUS tatarica.** **RUSSIAN MULBERRY.** Rapid growing, shade tree, well adapted to warm locations. 1-6 ft. L.

**PISTACIA.** The Pistacias make fine shade trees. They do well in California. Seedlings 3-6 ft. L. p. **Budded, improved sort.** 2-5 ft. N.

**PLATANUS orientalis.** **PLANE TREE.** Large tree with well rounded head. Widely endorsed for street or avenue work. Is well adapted to California conditions. 4-8 ft. L.

**POPULUS nigra Italicca.** **LOMBARDY POPLAR.** Tall, and of narrow growth. Esteemed as an avenue tree for its formal effect; may be planted in quite wet soils. 4-6 ft. L.

p. *norway.* 4-8 ft. L.

p. *pendula.* **weeping poplar.** Top grated. 4-8 ft. N.

p. *silver.* Very ornamental with its large leaves, white on the under side. 4-6 ft. L.

**PRUNUS cerasifera.** **FLOWERING CHERRY.** Dbl. white or ddbl. pink. 2-4 ft. N.

p. *cerasifera chinesis.* 4-6 ft. M.

p. *emarginata.* **ORNAMENTAL WILD PLUM.** Native of California. 1-2 ft. M.

p. *persica.* **FLOWERING PEACH.** Dbl. red or white. 4-8 ft. M.

p. *pissardii.* **PURPLE LEAVED PLUM.** 4-8 ft. L.

p. *triloba.* **FLOWERING PLUM.** Dbl. ddbl. pink, very pretty. 4-6 ft. M.

**PYRUS malus, Bechtel’s.** **FLOWERING CRAB.** Very popular flowering tree. 2-4 ft. M.

p. *malus neldwetzkyana.* **FLOWERING CRAB.** Of especial beauty; flrs. large, leaves red or bronze tinted. 3-6 ft. M.

**ROBINIA.** The Locust is one of the most desirable shade trees. 4-6 ft., all variety.

r. *hispa.* **ROSE COLORED LOCUST.** Flrs. large, deep pink; beautiful tree of moderate growth. C.

r. *langeiana.* New; flrs. in dense clusters; deep pink; foliage very striking with young growth bronze color; stem thickly covered with red hairs. D.

r. *late pink.* A variety which seems to have originated on our grounds, having rose pink flrs. in dense cluster, blooming almost continuously from June to September. Branches smooth. M.

r. *pseudacacia.* **BLACK LOCUST.** L.

r. *serrulata.* **ORNAMENTAL.** Exceedingly handsome. Flrs. pink. C.

r. *viscosa.* A very distinct variety. Stems dark red, gluttonous; flrs. pink, in very dense clusters; blooms in summer. C.

**SALIX.** The Willow, family is very large, and is found in almost every moist locations from Alaska to Mexico.

s. *babylonica.* **weeping willow.** 4-6 ft. L.

s. *elgantissima.* 4-6 ft. L.

**SAMBUCUS** aestivalis. **GOLDEN LEAVED ELDER.** Low bush or shrub, with light green leaves and black berries which make very fine jelly or pies. 1-2 ft. M.

s. *callicarpa.** **RED BERRIED ELDER.** A species found in Alaska with red berries. Exceedingly handsome as a decorative shrub. 1 ft. N.

s. *racemosus.* **ELDER.** Small spreading tree or large shrub. Always picturesque in naturalistic planting. 1-2 ft. M.

**SORBUS** aucuparia. **MOUNTAIN ASH, ROWAN TREE.** Of moderate growth, leaves shining, flrs. white, berries scarlet, in large clusters. Should be pruned annually to prevent it from becoming too straggling. 4-8 ft. L.

**TAXODIUM distichum.** **BALD CYPRESS.** Tall, graceful tree, with feathery foliage. 1-3 ft. B.

**Tilia.** The Linden are unequaled for avenue trees.

* t. americana. **AMERICAN LINDEN.** **BASSWOOD.** Tall, symmetrical tree; leaves very large. 3-4 ft. L.

* t. europaea. **EUROPEAN LINDEN or LIME.** Tall, symmetrical tree; compact-headed; leaves smaller than preceding. 3-6 ft. L.

**ULMUS.** **weeping elm.** 6-8 ft. D. Very large leaves and white, edible berries, very handsome. 1-2 ft. M.

**VITEX cinca.** **CHASTE TREE.** Small tree, or shrub, with finely cut leaves, and spikes of bright blue flrs. Exceedingly decorative and ornamental. 1-2 ft. C.

---

**DECIDUOUS SHRUBS**

**ABUTILON.** **FLOWERING MAPLE.** Large maple-like leaves and very showy, bell shaped flrs. in red, gold and white. 1-3 ft. B.

**AMORPHA** californica. **INDIAN BERRIES.** Handsome, native of California, with pinnate leaves like those of the locust. Flrs. in long finger-like spikes, deep purple, almost black, with conspicuous yellow stamens. 3-6 ft. B.

**BERBERIS thunbergii.** Dense, low, graceful. Flrs. yellow; fruit brilliant red; often used for hedges. In California almost an evergreen. 1-2 ft. B.

b. *vulgarna.* **COMMON BARBERRY.** Moderate grower, bright green foliage, becoming tinted; flrs. golden yellow; berries crimson; very good for hedges or bordering. 1-2 ft. B.

b. *vulgarna purpurea.* **PURPLE LEAVED BARBERRY.** Deep purple leaves, yellow flrs. and crimson berries. 1-2 ft. B.

**CAESALPINIA gillesii.** **BIRD OF PARADISE.** 1-3 ft. C.

**CALYCANTHUS occidentalis.** **ALLSPICE.** Sweet scented shrub, native of California; leaves large, dark red. 1-2 ft. B.

**CARYOPTERIS incana.** **BLUE SPIREA.** Almost evergreen here; free growing, with intense sky-blue flowers. Much liked by bees. 1-3 ft. B.

**CHILOPSIS linearis.** **DESERT WILLOW, FLOWERING WILLOW MIMBRES.** Native of California. Shrub or low tree, growing wild in dry districts south in Arizona. Also allied to Bignonia. Leaves long, narrow, on drooping branches; flrs. trumpet-shaped, lilac, with yellow stripes. 1-5 ft. B.

5 English Ixies
6 Acacia Cultriformis, Acacia Baileyana, Acacia Extensa, Acacia Saligna
CORNUS californica. DOGWOOD. Grows along creek bottoms. Flrs. small, in cluster; wood reddish; very pretty shrub. 1-2 ft. B.

C. florida. Shrub or small tree; leaves large, smooth, shining; flrs. large white or pinkish; berries large, bright red; said to be the handsomest American flowering shrub. 2-3 ft. B.

c. kousa. New. 1-3 ft. C.

c. mas. CORNELIAN CHERRY. Handsome shrub. Very attractive in early spring with its yellow flowers and again in fall with its shining scarlet fruit. 1-3 ft. C.

CRATAEGUS crus-galli. COCKSPUR THORN. Grows to 40 ft. or may be kept in hedge form. Very decorative and bright when in bloom, and in the fall with its beautifully colored leaves, and red berries lasting all winter.

CRATAEGUS coccinea. THORN. The Hawthorns are hardy, with single leaves and great sprays of sweet scented flrs. Recommended for color effects. They prefer a good, moist or clayey soil. If cultivated well, they thrive without irrigation. 4-6 ft. C.

CYDONIA japonica. JAPANESE FLOWERING QUINCE. Deep rose-colored flrs. in the spring before the leaves open. Very showy. 1-3 ft. C.

DEUTZIA. A very popular garden shrub of easy culture. Free flowering and very satisfactory. Dbl. and single white or pink 1-3 ft. B.
d. candida. 1-3 ft. B.
d. pride of ROCHESTER. 1-3 ft. B.

DIERVILLA (WEIGELA). These shrubs are mostly natives of China and Japan. The best flowers are obtained by pruning back to about 6 inches as soon as they are done blooming. Pink, single crimson and deep crimson. B.
d. sibolli. Variegated leaves, flrs. pink; very fine. 1-6 ft. M.

EXOCHORDA. PEARL BUSH. Flrs. large, pure white. 2-3 ft. B.

FORSYTHIA suspensa. GOLDEN BELL. Covered with clusters of yellow bell-shaped flrs. in early spring, before leaves are well opened. 1-3 ft. B.
f. viridissima. GOLDEN BELLS. Large shrub, covered in spring with yellow bell-shaped flrs; more erect than preceding. 1-3 ft. B.

FRAXINUS dipetala. FLOWERING ASH. Native of California. Shrub or small tree; flrs. fragrant. 1-3 ft. C.

HALESIA. Flrs. like those of the common snowdrop. 1-2 ft. C.

HIBISCUS diversifolius (ALTHEA). ROSE OF SHARON. Tall, shrubby; flrs. large, primrose-yellow, with red center. 2-3 ft. C.
h. syrurus. Woody shrub, with very handsome petunia-like flrs. Single white, dbl. blue, dbl. red. 1-3 ft. B.

HYDRANGEA mousseline. Deep pink; new. 5-7 in. pots, 1 ft., 75c.
h. hortensis. Flrs. in immense clusters, white to bluish or pink. 5-7 in. pots, 1 ft, 50c to 75c; in tub, $1.50.
h. nigra. Deep pink, 5 and 7 in. pots. 1 ft. 50c to 75c; in tub, $1.50.
h. paniculata. White, or changing to light pink. 5-7 in. pots, 1 ft., 50c to 75c.

KERRIA japonica. GLOBE FLOWER. Tall, slender shrub, covered during early spring and summer months with a profusion of rich yellow double or single flrs.; very bright and attractive. 1-2 ft. A.

LAGERSTROEMIA indica. CAPE MYRTLE. Pink or crimson. 1-3 ft. C.

LONICERA grandiflora. Shrub. Upright growing honeysuckle. Flrs. scarlet. 2-3 ft. B.

MALAVISCUS (ACHANIA) arboreus. TURK’S CAP. A native grower, erect shrub, with large leaves, and intense scarlet flrs. Very showy, where bright color is needed among more somber shrubbery. 1-3 ft. A.

NUTTALIA cerasiformis. 600 BERRY. Rather small, shrub, with large, oblong or roundish shiny leaves. Small drooping panicles of white flrs. in early spring, and large berries, red to purple in color. 1-2 ft. D.

PHIADELPHUS. MOCK ORANGE. Flrs. large, white. 1-4 ft. B.
p. coronarius. Very fragrant creamy-white flrs. 1-4 ft. B.

p. lewisi. Smaller flrs. than preceding, otherwise similar; native of California. 1-4 ft. B.

PRUNUS tomentosa. DWARF JAPAN CHERRY. Shrub or bush covered with small, scarlet, edible fruit. Exceedingly showy. 1-3 ft. C.

PUNICA granatum. SWEET-FRUITED POMEGRANATE. A variety with fruit of good quality, and of value in the market. 1-2 ft. C.
p. granatum. POMEGRANATE, WONDERFUL. A variety bearing very large, handsomely fruit of best commercial quality. 5-12 in. C.
p. granatum. Red or white. 1-2 ft. B.
p. granatum. Paper shell. 1-2 ft. B.

RHUS cotinus. SMOKE TREE. 1-3 ft. C.

PROSOPIS juliflora. MESQUITE. Spreading shrub, or small tree, growing in the desert lands of southern California and Mexico. Leaves like those of the locust; flrs. small; seed pods sweet and much relished by stock. 1-3 ft. C.

RIBES glutinosum. FLOWERING CURRANT. INCENSE SHRB. Deep pink flrs. 1-3 ft. C.
r. malvaceum. Native of California. Shrub, similar to glutinosum; flrs. dull red to purplish. 1-3 ft. C.
r. tenuifolium. Shrub, yellow flrs. and red fruit. 1-2 ft. C.
r. speciosum. CALIFORNIA FUCHSIA FLOWERING GOOSEBERRY. Fruit red, briall, 1-3 ft. C.

ROMNEYA coulteri. MATILDA POOPY. 4 in. pots, 75c; 87.00 per 10.

SALVIA. s. alba. Flrs. white or slightly tinted blue. 1-2 ft. A.
s. greggii. Shrub, native of Texas, quite woody and hardy; flrs. crimson, blooming nearly all the time if kept pruned. 1-3 ft. C.
s. greggii alba. Similar to above, but with white flrs. 1-2 ft. B.

SPIREA alba flava. Firs. white. 1-2 ft. B.
s. Anthony Waterer. Compact, free flowering, flrs. crimson. 1-2 ft. B.

s. argentea. Spreading. Flrs. small, dense. 2-3 ft. B.
s. billardi. 2-3 ft. B.
s. humalda. Small, flrs. white to pink. 2-3 ft. B.
s. callosa. Tall, variable; flrs. pink. 1-2 ft. B.
s. canescens. Tall, dense, white flrs. all summer. 1-2 ft. B.
s. douglasii. Crimson. 1-2 ft. B.
s. reevesiana. Small; leaves glaucous; flrs. white. 1-2 ft. B.
s. thunbergii. 1-3 ft. B.
s. van houttii. Arching branches; flrs. white, in many flowered umbels. 1-3 ft. B.

SYMPLICARPA. WAXBERRY. Bright glaucous leaved shrub, pink flrs. and red or white wax-like berries. Very good for massing in wild garden. 1-3 ft. C.

SYRINGA Charles X. VIOLET-LILAC. 1-3 ft. C.
s. josikaea. LILAC. Tall growing. Flrs. lavender. 1-2 ft. C.
s. lavandulifolia. Tall, leaves finely cut; flrs. lavender; very ornamental. 1-3 ft. B.
s. Madame Lemoine. Large trusses, white flrs. 1-3 ft. C.
s. President Grévy. Flrs. purplish blue, very dbl. 1-3 ft. C.
s. vulgaris. LAVENDER. 1-3 ft. B.
s. vulgaris. PURPLE. 1-3 ft. A.

TAMARIX aestsilvis. TAMARIX. Tall shrub or small tree. Branches purple; leaves narrow; flrs. pink; in large panicles, blooming in spring. 1-3 ft. B.
EVERGREEN TREES

ABIES douglasii. DOUGLAS SPRUCE. Stately pyramidal tree, native of this coast. 1-5 ft. P.
a. menziesii. STITKA SPRUCE. Alaska to Calif. Tall, slender tree of beautiful appearance. 2-5 ft. O.

a. nordmanniana. NORDMAN'S FIR. Native of S. E. Europe. Very handsome; leaves flat, dense, needle-like. 1-2 ft. C.
a. pungens. BLUE SPRUCE. Colorado. Esteemed for its beautiful blue foliage and symmetrical growth. 1-2 ft. P.

ACACIA. A genus is said to number about four hundred, but only a quarter have been introduced into California. They probably are more generally used than any other evergreen flowering tree.
a. armata. KANGABOO THORN. Large shrub or small tree; foliage dark green, shining; branches covered with fine thorns; rich yellow flowers, April and May; very good for massing or for hedge. 1-3 ft. L.

a. baileyana. Very handsome, feathery blue-green foliage; bright pink blooms; seed pods purple. The most beautiful of all the Acaecias. 1-6 ft. M.
a. dealbata. SILVER WATTLE. Large tree, feathery foliage, yellow furs in March; one of the best for shade, and broad avenues. 1-6 ft. L.
a. decurrens. GREEN WATTLE. Large spreading tree. 2-5 ft. L.

a. extensa. Tall flowering shrub, with long needle-like leaves; new. 1-2 ft. C.

a. farnesiana. CASSIE. Small tree, dark green feathery foliage; profuse deep yellow furs.; branches drooping. This tree is cultivated in south of France for perfumery; new. 1-4 ft. C.

a. floribunda. Rather slender growing tree, almost continually blooming; a favorite for street planting. 2-6 ft. L.

a. hispida. Shrub with fine needle-like leaves, and numerous small yellow furs.; habit rather drooping; very graceful. 1-3 ft. C.

a. latifolia. A spreading shrub; leaves long; often used as low windbreak; yellow furs. in spikes. 1-5 ft. L.

a. melanoxylon. BLACK WATTLE. Tall, symmetrical; well adapted for street planting; furs. dense, yellow. 3-6 ft. L.

a. mollissima. Large, spreading; handsome feathery foliage, and rich golden yellow furs. 1-5 ft. L.

a. normalis (var. decurrens) Tall shrub with angular branchlets; glands and margins of narrow leaves edged with red; furs. yellow, in long racemes. Very beautiful and distinct; new. 2-4 ft. M.

a. podalyriaefolia. ROUND LEAF SILVER ACACIA. Very beautiful and distinct. Leaves gray; furs. abundant in long yellow terminal racemes; new. 2-4 ft. M.

a. pravissima. Fair sized tree with pendulous branchlets thickly covered with short light-blue-green leaves and a mass of small golden yellow furs. Graceful and showy; new. 2-4 ft. M.

a. pruinosa. Small tree, with very graceful, feathery foliage, the young growth a beautiful bronze; new; quite distinct. 1-3 ft. C.
a. pycnantha. BROAD LEAF WATTLE. Branches rather pendulous, leaves large; furs. large and very numerous. 1-3 ft. B.
a. saligna. Low tree, drooping branches, large leaves; bluish; new. 1-2 ft. M.
a. verticillata. Spreading shrub or small tree. Leaves short, needle-like, in whorls, deep green; furs. small, numerous. Makes a very ornamental hedge. 2-5 ft. L.

ARARACURA bidwillii. BUNYA-BUNYA TREE. Rather hardy; used largely as a lawn tree; very slowly. 1-2 ft. P.

ARBUTUS menziesii. MADRONE. The most beautiful native Californian small tree. Leaves very large and shining; dark pale green, changing to red; furs. white, wax-like, in drooping panicles; berries rich red. 1-4 ft. O.
a. unedo. STRAWBERRY TREE. Ornamental tree or spreading shrub, with white boll-shaped wax looking furs. and red fruit resembling strawberries. A most beautiful hardy shrub for individual specimens or for massing. 1-3 ft. N.

CASTANOPSIS chrysophylla. WESTERN CHINQUAPIN. 6-8 in. P.

CASARARINA. BEEF WOOD. SHE OAK. Named from the Casawowry, the branches having a fancied resemblance to feathers. Many species, the following, both of which are very desirable when an evergreen tree is desired that will cause too dense a shade.
c. equisetifoila. Branches drooping, green and jointed, of sparse habit; a very graceful tree; should be pruned until the desired shape is attained. 3-6 ft. L.
c. stricta. 1-3 ft. M.

CEDRUS atlantica. MT. ATLAS CEDAR. Tall, symmetrical; very desirable for avenues or about dwellings; where there is ample space; a grand tree. 2-6 ft. P.
c. deodora. HIMALAYAN CEDAR. The grandest of all true cedars. Tall, symmetrical, of weeping habit; foliage blue-green. A familiar sight in front of the State Capitol at Sacramento. 3-6 ft. P.
c. libani. CEDAR OF LEBRON. A magnificent Cedar, rather slower of growth than the two preceding, darker in foliage, and more spreading. 3-6 ft. P.

CERATONIA silqua. CACAO. ST. JOHN'S BREAD. Handsome tree, well adapted to California conditions. The large pods borne on this tree form an excellent stock feed. 1-2 ft. D.

CEREOCORUS betulifolium. MOUNTAIN MARG-ANY. Small tree to 30 ft.; leaves thin bright green. 1-3 ft. E.

CINNAMOMUM camphora. CAMPHOR TREE. Forms a well shaped compact headed tree or tall shrub, according to locality. With its shining foliage, it is one of the very best for rich green ornamental planting; the young growth is reddish. Forms a larger tree in rich, moist soil in warm climate. Quite hardy. 1-2 ft. D.

CORNUS capitata. EVERGREEN DOGWOOD. A large sized shrub; furs. similar to eastern flowering Dogwood. Does well in California. 1-2 ft. D.

CRYPTOMERIA elegans. Very graceful and denser growing variety. 8-24 in. O.
c. japonica. JAPANESE REDWOOD. One of the most attractive conifers, adapted on porches, etc., in tubs, or planted on lawns. 2-6 ft. N.

CUPRESSUS arizona. ARIZONA CYPRESS. Grows to 40 ft.; its blue-green foliage is most striking and beautiful; evergreen in warm, sunny positions; a native of California and highly recommended for its many good features. 2-5 ft. and "flats." N.
c. benthamii. Branches horizontal, leaves bright green; tall. 1-3 ft. N.
c. **funbris**. 1-3 ft. N.  
**c. glabra**. **SMOOTH CYPRESS**. From Arizona.  
**c. gunnii**. 1-3 ft. L.  
**c. ** leucocarya. **WHITE IRON BARK**. Tall tree; stgs. dark purple-red; leaves bright blue-green; habit compact. 1-3 ft. N.  
**c. graecilis. **Slender branches. 3-4 ft. P.  
**c. lawsoniana**. **Compact variety of LAWSON**. 1-2 ft. P.  
**c. lawsoniana**. 2-5 ft. P.  
**c. macrocarpa. **MONTERY CYPRESS. Well-known native cypress, growing to very large tree; much used for hedges and windbreaks. 1-3 ft. and "flats." L.  
**c. milford**. Blue jacket. Rich blue foliage. 3-4 ft. P.  
**c. sempervirens. **ITALIAN CYPRESS. Tall, compact growth; much used in formal gardening. In Europe used as a windbreak very successfully. 2-6 ft. ball or can. N.  
**c. westernii. **Large, very ornamental variety of cypress. 2-3 ft. P. of cypress. 2-3 ft. and "flats." P.  
**ERYBOTRIA japonica. **LOQUAT. Large shrub or tree, with white flesh. In Australia it grows to a height of 4-8 ft. O.  
**EUCALYPTUS**.  
**E. amplifolia. **FOREST GRAY GUM. Habit similar to that of Red Gum, but stronger, and having broader leaves. 2-3 ft. L. Also in "flats."  
**E. bosistoana. **2-3 ft. pots and flats. L.  
**E. botryoides. **BASTARD MAHOGANY. 2-3 ft. L.  
**E. citriodora. **LEMON SCENTED GUM. Good grower, leaves downy; very fragrant; ornamental; best near the Coast, or for pot culture, the perfume of its leaves being so pleasing. 2-5 ft. and flats. M.  
**E. coriocalyx. **SUGAR GUM. Tall, bark smooth, leaves glossy, dark, very handsome tree, drooping branches. 1-2 ft. Flats. L.  
**E. crebra. **NARROW LEAVED IRON BARK. Tall, branches slender, drooping; leaves very narrow; bark persistent; very hardy. 1-2 ft. Flats. L.  
**E. diversicolor. **KAREL. 2-3 ft. L.  
**E. erythrophylla. **1-2 ft. B.  
**E. ficifolia. **CRIMSON FLOWERED EUCALYPTUS. 1-2 ft. L.  
**E. globulus. **BLUE GUM. Grown for wood or timber; suitable for wide avenues or windbreaks; the most rapid growing. 1-4 ft. Flats. K.  
**E. gomphocephala. **TOOART TREE. 2-3 ft. L.  
**E. goniocalyx. **MOUNTAIN GUM. 2-4 ft. L.  
**E. gunnii. **1-3 ft. L.  
**E. leucoxylon. **WHITE IRON BARK. Tall tree; stgs. dark purple-red; leaves bright blue-green; habit compact. 1-3 ft. Flats. L.  
**E. leucophloeon. **RED BOX. Tree spreading, moderate grower; bark persistent; leaves a beautiful silver-blue; hardy, and drought resistant. 1-4 ft. L.  
**E. modesta. **RED GUM. 1-4 ft. L.  
**E. robusta. **SWAMP MAHOGANY. Moderate grower; leaves large, stgs. green, in large clusters; hard, persistent bark. 1-3 ft. L.  
**E. rostrata. **RED GUM. Tall, rapid grower; very hardy. 1-5 ft. Flats. K.  
**E. rudis. **DESSERT GUM. Strong grower, thriving under arid conditions growing perfectly hardy. Good foliage, and profuse bloomer. 1-3 ft. Flats. K.  
**E. sideroxylon. **silky GUM. Moderate grower; bark dark; stgs. pink, profuse, very ornamental, and tree quite hardy. 2-3 ft. M.  
**E. sturtiana. **APPLE SCENTED GUM. Tall, branches drooping; hardy. 1-3 ft. L.  
**E. tereticornis. **1-4 ft. L.  
**E. viminalis. **MANNA GUM. Very tall, handsome tree; smooth bark. Grows very rapidly, and is extremely hardy and adaptive. 1-5 ft. Flats. K.  
**FICUS**.  
**F. microphylla. **MORETON BAY FIG. Very beautiful evergreen tree, forming compact head; in Australia it grows to a height of 4-8 ft. O.  
**F. parvifolia. **1-2 ft. O.  
**F. pumila. **MORETON BAY FIG. Very beautiful evergreen tree; forming compact head. In Australia it grows to a height of 4-8 ft. O.  
**F. robusta. **SWAMP MAHOGANY. Moderate grower; leaves large, stgs. creamy, in large clusters; hard, persistent bark. 1-3 ft. L.  
**F. rostrata. **RED GUM. Tall, rapid grower; very hardy. 1-5 ft. Flats. K.  
**F. rudis. **DESSERT GUM. Strong grower, thriving under arid conditions growing perfectly hardy. Good foliage, and profuse bloomer. 1-3 ft. Flats. K.  
**F. sideroxylon. **silky GUM. Moderate grower; bark dark; stgs. pink, profuse, very ornamental, and tree quite hardy. 2-3 ft. M.  
**F. sturtiana. **APPLE SCENTED GUM. Tall, branches drooping; hardy. 1-3 ft. L.  
**F. tereticornis. **1-4 ft. L.  
**F. viminalis. **MANNA GUM. Very tall, handsome tree; smooth bark. Grows very rapidly, and is extremely hardy and adaptive. 1-5 ft. Flats. K.  
**G. ROBERTSONIA. **SILK OAK. Tall, symmetrical, with fern-like foliage; clusters of bright orange-red stgs. 4-6 ft. M.  
**JUNIPERUS**.  
**J. bermudiana. **5-7 ft. O.  
**J. clinophila. **IRISH JUNIPER. 1-8 ft. P.  
**J. californica. **CALIFORNIA JUNIPER. 1-2 ft. N.  
**J. japonica variagata. **1-2 ft. N.  
**L. dentata. **DWARF L.  
**L. incisa. **INCENSE CEDAR. WHITE CEDAR. One of the grandest native conifers. Erect, strong trunk, with strong tapering trunk. Flourishes in hot, dry locations on shallow hillsides or in rich soils. 1-6 ft. O.  
**L. magnolia. **HANDIFLORA. Tallest and largest of the grandest large leaved evergreen tree. Should have rich soil, warm climate, and plenty of summer moisture. Flrs. very large, white, fragrant. 1-3 ft. N.  
**L. myrica californica. **WAX MYRTLE. One of the prettiest native California small trees. Leaves dark and lustrous, stgs. small; berries globose, thickly covered with wax, very rare under cultivation. 8-18 in., 1-2 ft. P.  
**PARKINSONIA**.  
**Picea**.  
**P. alba**. **WHITE SPRUCE. 2-4 ft. P.  
**P. engelmanni. **ENGELMANN'S SPRUCE. 1-2 ft. P.  
**P. excelsa. **NORWAY SPRUCE. One of the finest spruces; tall, shapely grower, very symmetrical. 2-5 ft. O.  
**P. marina. **BLACK SPRUCE. 1-2 ft. P.  
**P. rubra. **RED SPRUCE. Handsome tree; requires rather moist location. 1 ft. P.  
**PINUS alba**. **WHITE PINE. Very tall tree, of handsome appearance; leaves bright green. Succeeds well in California. 2-4 ft. O.  
**P. austriaca. **AUSTRIAN PINE. Tall, handsome tree; leaves long dark green, dense. 2-6 ft. O.  
**P. canariensis. **CANARY ISLAND PINE. Rather spreading; leaves light green and lustrous; very rapid grower, beautiful tree. 1-3 ft. D.  
**P. contorta. **CALIFORNIA SCRUB PINE. 1 ft. O.  
**P. divaricata. **AUSTRIAN PINE. Spreading tree, conical shape. 3-8 ft. O.  
**P. fremontiana. **Small tree with edible nuts or seed. 1-2 ft. O.  
**P. insignis. **(radiata). MONTERY PINE. No praise can be too high for this native pine, where quick, handsome effect is desired. Tall, shapely form of very rapid growth, adapting itself to almost any conditions in our hills and valleys. Invaluable as a windbreak. 3-6 ft. O.  
**P. montana. **DWARF MOUNTAIN PINE. Low growing, often prostrate. Very handsome tree, with bright green dense foliage, either as single specimens, or as undergrowth among other trees. 1-3 ft. O.
1 Berberis Aquilolium  
2 Nandina Domestica  
3 Eucalyptus Rudis and Linearis
p. guttata. CALIFORNIA. 1-2 ft. N.

p. pentagona. DOMINO PINE. 1-2 ft. M.

p. sylvestris. SCOTCH PINE. Tall, spreading, succeeding well in California. Also very valuable for timber. 2-6 ft. N.

t. tuberculata. KNOT CONE PINE. 1-2 ft. N.

PRUNUS californica. 1-4 ft. M.

p. ilicifolia. EVERGREEN WILD CHERRY. Small tree or shrub, leaves dark green, holly-like. Figs. white, in upright panicles, fragrant; fruit purple. This species makes the finest hedge in California. 1-2 ft. M.

p. integrifolia. CATALINA ISLAND. CHERRY. 1-3 ft. M.

QUERCUS. The Oak in California is sadly slighted. Almost all species, of which there are fifty or more, some evergreen, some not, do well here and many of them are suitable for avenue trees and for parks. The evergreens should be more largely planted.

q. ballota. A variety of the Holm oak, having smaller leaves, and bearing sweet acorns, which are largely used for feed in Southern Europe. Trees grow tall, with well rounded head. 1-4 ft. M.

q. chrysolepis. CALIFORNIA LIV. oak. Most beautiful of all native oaks. 1-7 ft. N.

q. engelm. 5 ft. N.

q. densiflora. TAN BARK or CHESTNUT OAK. Strikingly handsome, with large, bell-shaped, light leaves, dark green, and bronze on under side. Grows very tall in good soil. 1-3 ft. N.

q. suber. CORK OAK. Large tree with well rounded top. The species from which cork is obtained. 1-6 ft. N.

q. wislizeni. 1-3 ft. N.

q. manicata. 1-2 ft. M.

RETNOSPORA ericoides. Small upright conifer; delicate foliage, dark green to bronze. 1-3 ft. N.

r. plumosus aurea. 2-4 ft. P.

SCHINUS moll. "CALIFORNIA" PEPPER TREE. So popular and frequent that it has almost become recognized as a native, though coming from South America. 1-6 ft. L.

s. terebinthifolius. PEPPER TREE. Rather tender, leaves larger and darker green than S. Moll.; forms a more compact head; very handsome; but suited only to mild climate of the Coast. 1-6 ft. M.

SEQUOIA gigantea. CALIFORNIA BIG TREE. The Giant Redwood of the Sierra Nevada Mountains. Succeeds well anywhere in California. Its habit of growth is dense, upright and pyramidal; should be much more generally planted. 1-4 ft. O.

s. sempervirens. CALIFORNIA REDWOOD. For beauty and utility combined, this tree is undoubtedly the most valuable in the world. It succeeds anywhere in California, except where soil is too dry, or where winds are too severe. It should be planted as an avenue tree, for parking, or as individual specimens. 1-12 ft. N.

STERCULIA acerofolia. FLAME TREE. Tall, showy, with rich crimson firs. Suitable for lawn. 3-4 ft. O.

p. diversifolia. BRACHYCHITON. Tall, tapering trunk; bark smooth, green. Leaves poplar-shaped or ovate, like a maple; bell-shaped, white with colored center, wax-like. The tree has a most pleasing appearance in every way, and is likely to meet every requirement as an elegant, hardy street tree. 1-12 ft. N.

p. platanifolia. JAPANESE VARNISH TREE, CHINESE PARASOL TREE. Strong growing tree of round form. Leaves very long, shining, shaped like the maple. Firs. small. 1 ft. O.

TAXODIUM mucronatum. EVERGREEN BALD CYPR. Most beautiful tree with feathery foliage. For lawn center. Very rare. 4-6 ft. O.

TORREYA californica. TUMON. NUTMEG TREE. Large tree, with stiff, very dark leaves. Exceedingly handsome for lawns or for grouping as a background for light foliaged trees. Seed resembles nutmeg of commerce in aspect. 2-5 ft. P.

TRISTANIA conferta. BRISBANE BOX. Very handsome shade tree, much grown in New South Wales, along the boulevards. Withstands drought well. Firs. small white or spotted, fringed. Small. 25c, $2.00 per 10.

UMBELLULARIA californica. CALIFORNIA LAUREL, or BAY TREE. Rather handsome tree. This genus contains only one species, and is found only on the Pacific Coast. Especially adapted for forming groups of dense foliage, in deep, welldrained soil, with plenty of moisture. 1-5 ft. N.

ULMUS parvifolia. EVERGREEN ELM. 5-7 ft. N.

EVERGREEN SHRUBS

ABELIA grandiflora. Free-flowering Mexican shrub, with shining leaves and small bell-shaped light pink firs., hardy; straggling habit. 1-2 ft. C.

a. coffra. The kei apple of Cape of Good Hope. A spiny plant, fruit acid, used as pickles or conserves. 1-2 ft. C.

ACACIA ciliformis. KNIFE BLADE ACACIA. Large, round-headed shrub; leaves pale blue-green; profuse bloom of bright red in spring. Succeeds well with Armatas in grouping. 1-3 ft. B.

a. cyclops. Low spreading shrub with long leaves. Firs. solitary or in pairs; seed pods surrounded with scarlet funnel, or cord, very striking, new. 1-2 ft. C.

ADENOSTOMA fasciculatum. CHAPARRAL. Characteristic shrub of the chaparral or chenopodium regions of the Coast Range. In cultivation a very beautiful shrub with its long terminal panicles of white firs. 1-2 ft. C.

ARCTOSTAPHYLLUS pungens. MANZANITA. 1 ft. E.

a. uva-ursi. TRAILING MANZANITA. 1 ft. E.

AUCUBA japonica. Handsome shrub, with large green or golden spotted leaves, for shady location or for pot culture. 1 ft. C. In tub, $1.50.

a. virdis mascula. Bright shining leaves, red berries at Christmas time. 1 ft. C.

AUDIBERTIA polystachja. 1-6 ft. B.

a. stachyurus. BLACK SAGE. 1-2 ft. B.

BERBERIS. RABBERY. Under this head is composed an assortment of some of the most useful ornamental shrubs for the city lot or for extensive landscaping work. All have beautiful foliage, of varying shades of green and red. The firs. are yellow, and berries crimson or deep blue, and edible; they are excellent for jellies, pies, etc. We have several new species, all of which are well suited to California conditions.

b. (or MAHONIA) aquifolium. OREGON GRAPE. Beautiful low growing shrub, dark green leaves, tinted red in winter. Firs. bright yellow, followed by deep blue berries. Balled, 8-12 in., 75c; 1-2 ft., $1.25. In tub, $1.50.

c. californica. CALIFORNIA RABBERY. This is, without exception, the finest low growing native decorative shrub. Leaves smaller; and firs. holly-like, as well as intense in their vivid and ever changing coloring. Firs. bright yellow, in long racemes; fruit blue-black. 1-3 ft. P., balled. 25c, $1.50.

d. darwiniana. DARWIN'S RABBERY. Very ornamental shrub, foliage dark green, firs. orange yellow, berries dark purple. For bordering, massing or as individual specimens it is equally desirable. 1-2 ft. pots D., balled E.
b. elegantisima. New. Low growing shrub with light green foliage; good grower, and extremely bright and attractive. 1-3 ft., pots C. or balled D.
b. Gagnepini. 1 ft. D.
b. japonica. 8-12 in. D.
b. knightii. New. Leaves large, very dark glossy green; frs. large yellow; handsome and abundant. 8-24 in. D.
b. stenophylla. Very graceful shrub, with slender arching branches; frs. orange, yellow, berries blue. 1-3 ft. pots D., or balled E.
b. wilsoniae. Elegant shrub, with small leaves, branchlets covered with long yellow thorns, wood reddish; frs. golden yellow, in dense clusters; fruit salmon red. Very distinct, with vivid Autumn coloring; new. 1-3 ft., pots C., or balled D.

BUDDLEIA. The Buddleias are very suitable as a tall intermediate background in landscaping.
b. asiatica. Large shrub, leaves long, frs. white, in drooping panicles, fragrant. 1-3 ft. B.
b. davidii (var. wilsonii). Strong grower, dark green leaves. 8-24 in. B.
b. dwarf. Dark green; for bordering. 8-24 in. B.
b. elegans. Variegated gold. 8-24 in. B.
b. golden. Leaves pure gold. 8-24 in. C.
b. handsworth. 8-24 in. C.
b. microphylla. Low, almost prostrate; small leaves. 8-24 in. C.
b. myrtifolia. Graceful, drooping habit; small leaves. 8-24 in. C.
b. rotundifolia. Leaves roundish. 8-24 in. C.
b. sempervirens. Good grower, leaves dark green. 8-24 in. B.
b. trained. 8-24 in. C.

CALLISTEMON lanceolatus. BOTTLE BRUSH. Large, spreading shrub, with long leaves and deep crimson frs. very desirable owing to rich color of frs. 1-6 ft.
c. rigidum. BOTTLE BRUSH. Large shrub, with narrow leaves, stiff; frs. rich crimson. 3-6 ft.

CANTUA buxifolia. Branching shrub; leaves variable; frs. funnel-shaped, red; very showy. 1-2 ft. B.

CARPENTERIA californica. TREE ANEMONE. One of our handsomest native shrubs, with bright green foliage and large white frs., with prominent yellow stamens; delightfully fragrant. 1-3 ft.

CASSIA artemesoides. Shrubs, making a dense head. Leaves needle-like, dense and of pale green color, covered in summer with rich yellow frs. Grows well in dry, sunny places. 1-2 ft. C.
c. grandiflora. Shrub or small tree. Frs. in dropping racemes, pink, very showy. 1-3 ft. B.
c. tomentosa. 1-3 ft. B.

CEANOTHUS. This genus comprises a large assortment of native shrubs, as well as some hybrids: e.g. the Wild Ceanothus or Mountain Lilac is a most artistic shrub for landscaping.
c. arboresus. TREE LILAC or MYRTLE. Large upright shrub. Foliage dark and glossy; frs. in large panicles, color sky blue. 1-2 ft. C.
c. divaricatus. 1-3 ft. B.
c. hybridum. GLOIRE DE VERSAILLES. Large shrub, with frs. of various colors. 1-3 ft. C.
c. incanus. Frs. blue or white. 1-2 ft. C.
c. interregminus... 1 ft. B.
c. megacarpa. Large shrub, frs. light blue. 1-2 ft. B.
c. oliganthus. Moderate grower; good bloomer; bluish. 1 ft. B.
c. spinosum. One of the most beautiful of the Mountain Lilies. Large spreading shrub; branches smooth, green, somewhat spiny. Frs. sky blue, very profuse. 1-3 ft. B.
c. thyrsoidea. Large, spreading; foliage bright, deep green, frs. vivid blue. 1-4 ft. M.
c. velutinus. Trail variety. C.
c. verrucosus. Low shrub, spreading; leaves small, frs. white. 1-2 ft. B.

CESTRUM or HABROTHAMUS arium. CORAL PLANT. Shrub with large leaves and reddish or yellow, tubular shaped frs., borne in profusion all summer. 1-3 ft. A.
c. elegans. CORAL PLANT. Frs. deeper red than the preceding B.

CHOISYA ternata. MEXICAN ORANGE. Handsome evergreen shrub, with bright shining foliages and clusters of fragrant white frs. 1-5 ft.

CHORIZEMO illicifolia. Small; covered with bright orange and crimson pea-shaped frs.; leaves oblong, dark green, holly-like. 1-2 ft. D.

CISTUS. BOCK ROSE.
c. alba. 6-10 in., 1-3 ft. B.
c. maculatus. This variety is the most beautiful of the whole family. Shrub to 3 ft. or more in height. Frs. large, single, white with dark crimson dots at base of petals. Likes plenty of sunshine. 1-2 ft. C.
c. purpureus. Similar in habit to above, but with dark crimson frs. 2-3 ft. B.
c. rosea. Frs. bright pink. 2-5 ft. B.

COPROSMA baueri. Beautifully green, glossy leaves. Forms a good sized shrub. Nothing finer for massing when a rich shining green effect is desired. 2-4 ft. B.

CORNUS capitata. DOGWOOD. A splendid shrub of rather large size. Frs. are large like those of the Eastern "Flowering Dogwood" or the Pacific Coast species, but the plant is far more graceful under cultivation in California than either. Frs. are cream colored, becoming reddish before falling, followed by large, red, showy fruits which are edible. 1-2 ft. B.

CORONILLA emerus. SCORPION SENA. CROWN VETCH. Very bright, pretty shrubs of straggling nature. Frs. winged, yellow, blooming all summer. 1-3 ft. B.
c. glauca. Smaller leaves more glossy, and of dwarfer habit; continuous bloomer. 1-2 ft. B.
c. glauca variegata. 1-2 ft. B.

COTONEASTER. The Cotoneasters are nearly if not quite evergreen in California, and are among the most desirable shrubs for moderately dry, sunny places. They have white or pinkish frs. in summer, and are covered with orange scarlet or crimson berries in the fall and winter. Some are tall, some spreading and some trail on the ground.
c. augustifolia. Of stiff, spreading habit, growing to a good size; a perfect mass of orange colored berries in the fall. 1-3 ft. C.
c. franchetti. Upright, much branched and spreading shrub; very handsome; berries bright reddish-orange. 1-2 ft. C. Balled, 2-4 ft., $1.50.
c. frigida. Large shrub, to 20 ft. in height; leaves evergreen; flowers white. 1-3 ft. B.
c. horizontalis. Almost horizontal; much branched; leaves round pointed at both ends, frs. pink, berries bright red, quite small. Magnificent single among flowering shrubs, 1 ft. 1-3 ft. C.

The following frs. to 3 ft. high and more, and are in the class of shrubs which may be used as a cover for banks or borders. 8-12 ft. B.

LEONARD COATES NURSERY COMPANY Inc.
c. microphylla. Low, almost prostrate shrub, densely branched. Leaves dark green, shining; berries crimson. 1-3 ft. pots. C. 1-2 ft. balled, $1.50.

c. pannosa. Tall, leaves long, berries bright red. Grows to 6 ft. high. 1-5 ft. C. Specimen. 25 C.

c. simonsii. Spreading, growing to four feet. Firs, pinkish, berries red. 1-3 ft. C.

c. thymifolia. Similar to horizontalis, but taller. 1-3 ft. C.

CRATAEGUS crenulata. BURNING BUSH. EVERGREEN HAWTHORN. Large shrub, or may be trained as a tree. Use in clusters, berries scarlet, very profuse. This is a most satisfactory shrub, and should be largely planted. It is beautiful at any time of year.

c. pyracantha lalandi. Of rather slender habit of growth; berries orange-yellow. 1-2 ft. C.

c. yunnanensis. New and rare. Very bright and glossy foliage, berries coral red. 1-3 ft. C.

CUPHEA hyssopifolia. 1 ft.

CYTISUS (GENISTA) andreae. BROOM. 1 ft. D.

c. alba. 3-5 ft. 10 C.

c. baccifer. 2-3 ft. 10 C.

c. baccifer mono. 1-2 ft. 10 C.

c. canariensis. Much branched shrub. Firs, bright yellow; makes a fine hedge, or is very handson in groups. 2-3 ft. B.

c. hispanica. SPANISH BROOM. Large shrub, covered in summer with its clear yellow firs., very handsome for California conditions. One of the most satisfactory hardy shrubs. This variety is by far the best, much like Scotch Broom, but stronger. 1-4 ft. B.

c. monosperma. New variety of broom; slender, drooping; firs white, very graceful. 1-3 ft. D.

c. monosperma pendula. 1-2 ft. D.

c. nigricans. Small, firs. yellow, in slender racemes. 1-2 ft. C.

c. proliferus. Large, leathy broom, firs. white. 1 ft. B. 1-3 ft. B.

c. racemosus. 1 ft. C.

c. scopolarius. 1-2 ft. B.

c. tincctoria. 1-2 ft. B.

DENDRACEMON rigidum. CALIFORNIA TREE POPPY. 1-2 ft. E.

DIOSMA. BREATH OF HEAVEN. Very fine, feathery foliage delightfully fragrant. Firs. small white or purple. Very useful as pot plant, for window dressing, lawn specimens or for a border. 1-3 ft. C.

DURANTA plumeri variegata.. 1 ft. C.

ELEAGNUS pungens. Spreading shrub, shining silvery leaves, firs. small, in clusters; fruit quite ornamental. 1-5 ft. C.

e. reflexa. 8-12 in. C.

e. reflexa aurea maculata. 8-12 in. C.

ENCelia californica. Grows 2-4 ft., woody at base; downy, strong scented, firs. large, often 2½ in. across; yellow, black center; useful for dry places. 1-2 ft. C.

ERICA carnea. MEDITERRANEAN HEATH. Bushy, covered with rosy pink firs. in the spring months. 6-10 in. 5 C.

e. cotonoides veitchii. White flowering heath; spring bloomer. 1-3 ft. C.

e. Felix Faure. A new variety, exquisitely beautiful, and well adapted to California conditions. 8-12 in., $1.00.

e. mediterranea. HYBRID. Very lovely. 8-12 in. C.

e. melanthera. Flowers in winter, rosy colored; strong grower. 1-2 ft. C.

e. persolata alba. 1-2 ft. D.

e. ramosa. CORNISH HEATH. Grows to 2 or 3 ft. high. 1-2 ft. C.

ERIGNUM fasciculatum. WILD BUCKWHEAT. A most interesting small shrub, covered during the summer with racemes of small pinkish firs. 1-2 ft. C.

ESCALLONIAS. All have dark, glossy foliage, forming compact shrubs from 3 to 8 ft. high. They succeed well in California, and are invaluable for massing.

e. alba floribunda. White firs. borne in terminal panicles. 1-3 ft. C.

e. berteriana. White. 1-3 ft. C.

e. exoniensis. Strong growing; firs. white; new. 1-3 ft. C.

e. ingramii. Flowers crimson; new; very fine. 2-4 in. C.

e. macrantha. Leaves large; firs. red; new. 1 ft. 5-1-3 ft. C.

EUGENIA kenswokneriana. New; recommended as even more desirable than the myrtifolia, and quite as well adapted to California conditions. 1-2 ft. C.

e. myrtifolia. AUSTRALIAN BUSH CHERRY. Grows to a good sized tree, but in California used as a shrub, trimmed into any shape, or as a clipped hedge. Good grower, leaves bright and glossy, young growth reddish. Firs. white, fruit nearly 1 in. long, red, used for jellies. 1-4 ft. D.

EURYHA japonica. Decorative foliage shrub allied to camellias. Suitable for glass house cultivation. Small greenish white firs. 1-2 ft. D.

EVONYMUS. Most very useful shrubs, upright spreading or trailing; particularly valuable in landscaping for their beautiful foliage effects. They make admirable hedges and are well adapted to California conditions. They show to far better advantage in groupings, with plenty of room.

e. E. BUSH. E. japonica. 1-2 ft. B. E. japonica. 1-2 ft. B. E. japonica. 1-2 ft. F.

e. E. aurea. 1-3 ft. B.

e. E. variegata. PRES COUTIER. Leaves beautifully mottled. 1-2 ft. B.

e. polchellus. Dwarf; very small dark leaves. 1-4 ft. C.

e. variegated golden. 1-2 ft. B.

FABIANA imbricata. Heath-like shrub, growing to 6 or 8 ft. Firs. profuse, white, tubular; very ornamental; should be kept well pruned. 1-3 ft. B.

FEIJoa. PINEAPPLE GUAVA. 8-18 in. D.

Ferns. Native Calif. in variety. 5 and 7 in. pots. R.

Fremontia californica. One of the finest native shrubs, with rather spires, pinkish leaves, bronze underside. Firs. a very rich dark yellow, petals thick, and waxy. 8-12 in. 1-2 ft. F.

GARRYA elliptica. SILK TASSEL SHRUB. Grows to 8 ft. Leaves dark green, stiff, drooping, spikes of firs. often 1 ft. long; a beautiful shrub. 6-18 in. E.

Grevillea theilmanniana. Tender. 8-18 in. D.

Guava. lemon colored. Makes a very ornamental shrub. 8-12 in. D.

G. straberry. Ornamental shrub, bearing a red fruit unexcelled for jellies. 1-2 ft. D.

Hakea. The Hakes are evergreen shrubs or trees, native of Australia, drought resisting, and which will also stand some frost. They should be much better known in California, and we recommend them highly.

eh. laurina. Tall shrub or tree, with long, narrow leaves. Firs. crimson, with numerous prominent yellow styles. A most handsome shrub, usually called "the glory of the gardens of the Rivera." 3-6 ft. M.

eh. saligna. Firs. white, in clusters, 3-4 ft. D.

H. suaveolens. Round headed shrub, growing to 12 or 15 ft.; leaves narrow, with rigid spine-like tip, branched; firs. white, fragrant. Good for massing in parks or grounds; grows well in dry places. 4-6 ft. D.
1 Ampelopsis Inconstans Lowii  
2 Cotoneaster Horizontalis  
3 Crataegus Crenulata  
4 Vitis Henryi  
5 Schinus Molle
HETEROMELES arbutifolia. TOYON, CHRISTMAS BERRY, RED BERRY. Most attractive and popular red-berried shrub, with profusion of clusters of white firs. Indispensable in any landscaping work. 1-3 ft. C.

HYPERICUM. ST. JOHN'S WORT, GOLD FLOWER. Most desirable shrubs, low growing or medium height with large bright yellow firs. These shrubs are very bright and useful in bordering, as a foreground to larger shrubbery.

I. Lonicera. Large shining foliage; firs. large, bright yellow; low growing. 1 ft. B.

h. moserianum. Very large firs.; shrub low growing, bushy. 1-2 ft. B.

h. moserianum tricolor. Similar to preceding, with variegated foliage. 1-2 ft. C.

h. nepalensis. Taller growing and with slender firs. 1-3 ft. C.

ILEX aquifolium. ENGLISH HOLLY. Well known evergreen. Grows best near the Coast in or near coastal counties. 1 ft. D.

JUNIPERUS communis. IRISH JUNIPER. Upright shrub or small tree; foliage light green. E. j. sabina. Spreading or procumbent; foliage dull blue-green. bi-2

j. japonica variegata. Foliage edged silver. 1-2 ft. E.

j. sanderi. More compact than preceding. 1-2 ft. E.

j. procumbens. 1-2 ft. E.

LAURUS cerasus. ENGLISH LAUREL. The finest large compact shrub for rich green effect. Leaves very large, shining. 1-2 ft. C. 2-4 ft., can or ball. F.

l. lusitanica. PORTUGAL LAUREL. 1-3 ft. F.

l. nobilis. SWEET BAY. Ornamental, erect shrub, with dark green leaves. Used most often in formal gardening, or for porch decoration in tubs. 1-7 ft. O.

LAVATERA assurgentiflora. TREE MALLOW. Shrub, with large crimson firs., growing in dryest places; often used as windbreak or screen, particularly near the coast. 1-5 ft. A.

LEMON ponderosa. 1-3 ft. E.

LEONOTUS leonurus. LION'S TAIL. Half woody shrub, with showy orange-scarlet firs. 1 ft. A.

LEPTOSPERMUM laevigatum. AUSTRALIAN TEA TREE. Tall, spreading shrub, rather drooping. Leaves small, shining, firs. small, numerous, white. This is the most useful ornamental shrub for grouping, screen or windbreak. 1-3 ft. C. 3-5 ft. balld. D.

l. langiurem. 0-3 ft. B.

LIGUSTRUM ariugue. GOLDEN LEAVED PRIVET. 2-3 ft. B.

l. ciliatum. New. 1-2 ft. D.

l. henryi. New. 8-10 in. Thee.

l. japonicum. JAPANESE PRIVET. Large bushy shrub, with very rich dark green foliage. Firs. white, in broad panicles, 4 or 5 inches long. An exceedingly handsome shrub, suitable for massing; background to border; as individual specimens, or for porch decoration. 1-3 ft. B. 4-6 ft. specimen plants in tubs. O.

l. massalongeurum. New. 1-2 ft. D.

l. ovalifolium. CALIFORNIA PRIVET. Used mainly for hedges, for which purpose it is excellently adapted. It makes a perfect hedge, and stands clipping well. 2-3 ft. A. 2-3 ft. open ground. K. 6-10 in. in, flats. 5c.

l. regelianum. REGEL'S PRIVET. 2-5 ft. C.

l. sinense. 1-2 ft. D.

LOBELIA cavanillesii. Tall flowering shrub, with nodding red and yellow firs.; also makes a good pot plant; very showy. 1-2 ft. A.

LONICERA hispida. Upright branches; very beautiful; new. Leaves minute, almost needle-like; very dense; firs. white, followed by purple berries. Should be kept well trimmed. 8-24 in. D.

LOROPETALUM. Shrubs grown chiefly for their white firs., appearing in winter or early spring. 1-2 ft. C.

MELALEUCA. Large shrubs, well suited to Californian conditions. Very ornamental, with their small fine foliage, and bright firs.; in many colors. Firs. are dense, with prominent stamens, and resemble a small "bottle-brush." Very pretty on a lawn or in groupings.

m. decussata. 1-4 ft. h.

m. ericifolia. Small tree or shrub, with fine heath-like foliage; firs. yellowish-white. 1-4 ft. B.

m. hypericifolia. Tall growing, leaves long, narrow; firs. red; very handsome shrub. 2-3 ft. B.

MIMULUS cardinalis. SCARLET MONKEY FLOWER. Grows in rather moist places, or along water courses. 10-15 in. B.

MYRTUS communis. COMMON MYRTLE. Glossy, fragrant leaves and numerous white firs. Nothing is better for close grouping, where height is not required; or the individual shrub is beautiful anywhere. 8-18 in. B. 1-2 ft. balled. D.

m. microphylla. Fine leaved variety. 1-2 ft. B.

m. microphylla. 1-2 ft. B.

NANDINA domestica. Japanese shrub, succeeding in most parts of California; grows 4-5 ft. high. 8-12 in., 50c. 1-2 ft. D. 1-3 ft. balled or tub, P.

NIEREMBERGIA. Small shrub or pot plant, covered with single dark violet firs. Hardy. Very attractive. 1-2 ft. B.

NERIUM. The well known OLANDER, while native of the Mediterranean region and of Japan, is preferably "at home" in California, especially where there is deep red sunshine. The Olander, contrary to preconceived ideas, thrives in any fairly good soil, even without irrigation. Nothing is more gorgeously beautiful than groups of avenues of Olanders reveling in the bright sunshine of California. Named varieties are more or less puzzling, so we list under described colors, the plants being all propagated from our own blooming shrubs on our own grounds. 1-3 ft. C. 2-4 ft. can or ball, E.

dbl. crimson; dbl. pink; dbl. salmon pink; dbl. white; single crimson; single deep rose; single light pink; single light salmon yellow; single white.

OSMANTHUS ilicifolia. From Asia. Leaves oval, remarkably lustrous. Firs. fragrant, in small clusters. Quite hardy. 1-5 ft. N.

PACHYSANDRA terminalis. Trailing shrub for borders or rockeries, and berries. 4 and 5 in. pots. R.

PHILODENDRUM. Mexican. The evergreen mock orange, fast growing shrub of straggly growth. Firs. 2 in. across, in large clusters. Very fragrant. Constant bloomer. 1-5 ft. C.

PHOTINIA serrulata. Large shrub, with very handsome foliage, beautifully tinted in winter. The firs. are followed by showy red berries. 8-12 in. D. 2-4 ft. balled, F.

PITTOSPORUM. Evergreen shrubs or trees, particularly well suited to California conditions, and noted for their bright foliage, and, in some cases, handsome firs.

p. crassifolium. Tall, with whistled, rather downy leaves, and small deep red firs. It makes a good hedge or windbreak. Does well near the Coast. 2-3 ft. C.

p. eugeniodes. TARATA. Very bright colored foliage. 2-3 ft. C.

p. nigricans (tenfusfolium). TAWHITI. Small shiny, lustrous leaves, stems dark red, almost black. One of the very best for hedges. 1-5 ft. C.
**LEONARD COATES NURSERY COMPANY Inc.**

p. phylleroidea. NARROW LEAVED PITTSFORUM. Fair sized tree, resembling an evergreen Weeping or Willow, but doing well in very dry places. Excellently graceful and graceful. Leaves very long, narrow; branches drooping; fls. bright yellow; borne in the axils of the leaves. 1 ft. C.

p. rhombifolium. 1 ft. B.

tobira. JAPANESE PITTSFORUM. Low growing, white, fragrant fls. 1-2 ft. D.

tobira variegata. Leaves white and green. 1-2 ft. D.

undulatum. VICTORIAN BOX. Leaves large, wavy. Fls. white and very fragrant at night. Very beautiful for lawns. 1-8 ft. B.

**PLEROMA** splendens. A tree blooming shrub that can be trained on trellis or pillar. Can be used for summer bedding. 4 in. pots. 8-10 in.

PLUMERIA capensis. LEADWORTH. In California evergreen. Small straggling shrub, or half climber. Fls. in rather loose clusters, a perfect sky blue. 1-8 ft. B.

POLYGALA dalmatianis. Small shrubby plant, rather light in foliage; covered with rich, rosy-red fls. 1-3 ft. B.

PUNICA granatum. Portugal D. Dwarf. This makes a most beautiful pot plant, or used as small shrub, a minute reproduction of the double red, but evergreen. Very rare. 6-10 in. E.

**RAPHIOLEPS ovata.** Compact shrub, with large, dark green leaves; fls. white; berries large, black. A most useful shrub for low interplanting or massing. 8-16 in. D.

**RHAMNUS californicus.** COFFEE BERRY. Large shrub, rich green foliage; berries red to black. Useful in semi-naturalistic effects. 1-3 ft. D.

r. purshiana. 8-24 in. D.

**ROHDEA japonica.** 4 in. pots.

**RHUS integrifolia.** SUMAC FAMILY. Shrub, or small tree, panicles of fls. white, or pinkish; berries ½ in. long, dark red. 1-3 ft. D.

r. laurina. Aromatic shrub, with long leaves, and dense panicles of greenish white fls. 1-2 ft. E.

t. ovata. 1-2 ft. D.

**SANTOLINA Chamaecyparissus.** LAVENDER COTTON. 6-12 in. A.

**SOLANUM.** Burbank. Climbing shrub, with bluish or violet fls. Very pretty in bloom, and grows readily almost anywhere. 1-2 ft. E.

s. pseudo-capiscum. JERUSALEM CHERRY. Small leafy shrub. 6-12 in. C.

s. xanti. Low shrub, of rather straggling habit. Fls. violet, large, fruit berry-like, erect, greenish to purple in color. Grows well in any well-drained soil. 1-2 ft. C.

**STREPTOSOLEN** jamesonii. YELLOW HELIOTROPE. Half-woody shrub, or climber, with rich orange-yellow tubular fls. May be planted against the Coast; will not stand frost. 1-2 ft. B.

**STRYAX californica.** STORAX. Shrub with snowdrop-like fls. Very rare. Small. $1.00.

**SWAINSONIA** alba. Fls. white. 6-12 in. B.

s. rosea. WINTER SWEET PEW. Resembles sweet pea in flr.; blooms all the year. A shrub, or half climber; fls. crimson. 1-3 ft. B.

**TAXUS** baccata. ENGLISH YEW. 1-3 ft. E.

t. baccata aurea. 6-12 in., 75c.

t. baccata eleganissima. 6-12 in., 75c. 1-2 ft. balled. F.

t. baccata fastigiata. IRISH YEW. Upright, compact, foliars dark green. Very much liked for formal planting, in tubs for porch adornment. 8-12 in. D.

t. baccata fastigiata variegata. VARIEGATED IRISH YEW. 8-12 in. D.

t. hibernica aurea. 6-12 in. D.

---

**THUJA** borealis glauca. 3 ft. F.

t. compacta. Close growing compact shrub, for formal planting or for porch decoration. 2-8 ft. F.

t. rosedale. ARBOR VITAE. One of the best moderate growers of its class. Foliage dense, fine and all the beautiful foliage color all winter. 12-16 in. D, or balled F.

t. occidentalis. ARBOR VITAE. Grows to large shrub, or tree, and very useful as a low windbreak or hedge. 2-6 ft. D.

**ULEX** europeus. FURZE. Gorse, WHIN. Spiny shrubs; its pea-shaped yellow blossoms borne almost all the year. Very useful for planting in masses in dry places. 1-3 ft. B.

**VERONICA.** SPEEDWELL. Evergreen shrubs, mostly native of New Zealand, and well adapted to California conditions. They do better in fairly moist soil, or should have water in summer. They thrive in full sunshine or partial shade. Very useful in forming dense shrubbery or thicket.

t. alba. Rather tall, upright growers; fls. white in erect racemes. 1-3 ft. A.

t. andersonii. Vigorous shrub spreading; fls. purple. 8-12 in. B.

t. barkeri. 8-12 in. D.

buxifolia. 8-12 in. D.

chatanica. 8-12 in. D.

cupressoides. Very distinct. Slender branches; leaves narrow, almost needle-like; fls. blue; fruit black. 1-2 ft. C.

imperialis. Grows to about 4 or 5 ft. Fls. purplish blue; one of the best; very free flowering. 2-3 ft. C.

pinquinolia. 8-12 in. D.

purpurea. 1-3 ft. C.

traversii. Dense growing, rather low shrub; fls. white. 1-3 ft. B. 2-4 ft. in turb. E.

variegata. Strong grower; foliage creamy white variegated; fls. lilac. 1-2 ft. C.

**VIBURNUM.** The evergreen viburnums are hardy and handsome, with good foliage. Fls. small, in showy clusters.

t. feodorum. Upright shrub. White fls. and red berries. 1-2 ft. C.

t. japonicum. Handsome large leaved evergreen shrub, growing to 6 ft.; red berries. 1-3 ft. D.

t. odoratissimum. Evergreen shrub, upright, bright green leaves. White fragrant fls. and red berries changing to black. 4-6 ft. O.

robusta. 1-2 ft. E.

t. tinus. LAURUSSTINUS. Bushy shrub, dark green leaves. Fls. white or pinkish-white, fragrant; black berries. 1-3 ft. C. Balled. 1-3 ft. F.

t. variegatum. 1-2 ft. C.

---

**PALMS**

**CHAMEROPS** excelsa. WINDMILL PALM. Very hardy, and one of the best for porch decoration or for outdoors. In tub. 1-2 ft., $1.75; 2-3 ft., $2.25; 3-4 ft., $2.75. In gal. can, 1-2 ft., $1.00.

c. humilis. Dwarf growing; quite hardy; for porch decoration. Fine specimens in box 1-2 ft., $2.50; 2-3 ft., $3.00; 3-4 ft., $3.50.

**COCOS auritula.** PINO PALM. Very graceful and suitable for porch or outdoor culture. Quite hardy. 2-8 ft., $8.25; 3-4 ft., $8.75.

**ERYTHEA armata.** BLUE PALM. Very handsome; leaves tall and shaped. Quite hardy. In boxes, 2-3 ft., $3.50; 3-4 ft., $4.00.

c. edulis. GUADALUPE ISLAND PALM. Very hardy; leaves tall and shaped, handsome. In box 2-3 ft., $3.25; 3-4 ft., $3.75; 4-5 ft., $6.50.
JUBAEA spectabilis. HONEY PALM. Very handsome specimens. Quite hardy. Box, 3-4 ft., $4.50.

PHOENIX canariensis. CANARY ISLAND PALM. Large, spreading; quite hardy. 1-2 ft., $2.25; 2-3 ft., $2.75; 3-4 ft., $3.75.

WASHINGTONIA. CALIF. Fan Palm. 1-2 ft., $1.25.

AGAVES, DRACENAS, ORNAMENTAL GRASSES

AGAVE. CENTURY PLANTS. In pots, 40c; tub, 1-2 ft., $1.25.

a. variegata. In pots, 50c; tub, 1-2 ft., $1.50.

CORYLINE (DRACENA) australis. gal can, 1-2 ft., $6.50 per 10; 5 gal can, 2-3 ft., $1.75; $15.00 per 10; 3-4 ft., $2.25; $20.00 per 10; 4-5 ft., $3.00; $27.50 per 10.

c. terminalis. Pot, 1-2 ft., 75c; $6.50 per 10.

DWARF. Three kinds. Clumps, $1.00 each.

ARUNDO donax. GIANT REED. Excellent for screen or windbreak. Large clumps, $1.00.

M goofmule mornulac. In California, practically an evergreen trailer. Grows well on dry banks. Flrs., 1-2 inches in diameter, of a beautiful shade of blue, with lighter throat. Blooms all summer; very handsome. 4-5 in. pots. R.

EVONYMUS radicans. Trailing, leaves dark green. 1-3 ft. B.

c. variegata. Leaves variegated, turn red after frost. Fine. 1-3 ft. B.

e. sieboldii. Low, spreading, leaves turning red in fall. 1-3 ft. B.

FRAGARIA indica. TRAILING STRAWBERRY. Useful for covering banks, for window boxes, hanging baskets. V.

HEDERA. ENGLISH IVY. In variety; see under "climbing." Also used as a ground covering, in partial shade, or under oak trees. R. Small one in can. W.

HELIANTHEMOS or SUN-ROSE. Flrs. white, pink, yellow, rose, copper, red or cream. 4 in. pots. V.

HYPERICUM dwarf. 1 ft. C.

JUNIPER sabina. 1-2 ft. E.

LEONTOPODIUM (GNAPHALIUM) EDELWEISS. Useful plant for rockeries and borders that do not have too much water. Small whitish leaves. 8-12 in. Q.

LIPPIA repens. Small creeping plant, with pink daisy-like flrs., making a fine green sod, and useful for lawns. Does not require much watering. $1.00 per 100.

MAHERNIA verticillata. HONEYBELLS. Half woody struggling small shrub. Flrs. numerous, bell-like, yellow. Fragrant. Suitable for hanging baskets, or ground cover. 8-10 in. R.

MESEMBRYANTHEMUM. In varieties. V. m. aurantiacum. Small leaves, with vivid coppery-red flrs., very striking. 1-2 ft. A.

MICROMERIA douglasii. TERRA BUENA. Z.

PACHYSANDRA. Terminalis. 4-5 in pot. R.

TRADESCANTIA fluminensis. WANDERING JEW. For hanging baskets or ground cover, or for rockeries. V.

VERBENA erinoides. MOSS VERBENA. Colors white or purple; grows in dry places. 4 in. pots. Q.

v. hybrid. COMMON GARDEN VERBENA. Crimson, purple, white, pink, or blue. W.

v. venosa. Grows 1 ft. high; flrs. violet to almost blue. Q.

VINCIA alpina. New. Z.

v. major variegata. PERIWINKLE. Foliage green and white, tinted gold; flrs. large bright blue. One of the best ground covers. In can. X. Hardy. Evergreen.

v. minor. Same as preceding, but leaves smaller and dark green. Flrs. blue. X.

v. minor alba. Leaves small, dark green. X.

CLIMBERS AND HANGING BASKET PLANTS

(*Deciduous Varieties)

AKEBIA quinata. Leaves bright; flrs. rosy-pink; fragrant. B. $2.55.

*AMELOPSIS inconstans lowii. Leaves finely cut, deep green, turning red. New. R.

a. quinquefolia. VIRGINIA CREEPER. R.

a. engelmanii. Similar to quinquefolia, but smaller leaves. R.

a. sempervirens. EVERGREEN BOSTON IVY. Makes fine ground cover. R.

* a. veitchii. BOSTON IVY. Leaves turn red. Self-clinging. R.

ASPARAGUS plumosus. For hanging baskets or out of doors along coast. B.

a. sprengeri. For hanging baskets, or cover for trellis near Coast. R.

BIGNONIA chererea. Flowers red, trumpet shaped, rather hardy. B.

b. grandiflora. Flowers large, red, trumpet shaped. R.

b. tweediana. Flowers yellow. Rather tender. R.

BOUGAINVILLEA. Flowers crimson; very showy. Rather tender. 4 in. pot. 75c.

*BOUSSINGaultia. MADEIRA VINE. Strong grower; tuberous rooted; perennial. Flrs. white. Y.

*BRIDGEsia spicata. Beautiful vine; flrs. rosy-pink; leaves rich green; clings to tree. Hardy. S.

*Clematis californica. VIRGIN'S BOWER. R.

* c. jackmanii. Flrs. deep purple, large. 85c.

* c. montana. Vigorous; flrs. large, white, in clusters; fragrant. S.

* c. mme. Edward Andre. Red, large. 85c.

* c. paniculata. JAPANESE VINES. Flrs. white fragrant. S.

* c. Ville de Lyon. Carmine; large. 85c.

CLIANThUS. PARROT'S BILL. Flrs. red. S.

DOLICHOs. AUSTRALIAN PEA VINE. Flrs. deep rose. Q.

EVERGREEN SYRINGA. S.

FICUS repens. CLIMBING FIG. Clings to walls. R.

GESLeum. CAROLINA yellow JESSAMINE. R.
HEDERA. ENGLISH IVY. Splendid assortment. Hardy.

h. amurenensis. Very large leaves; light green. R.
h. angustifolia-aurea. Finely cut. Golden green. R.
h. azorica. Leaves large, glaucous green. R.
h. dentata aurea. Very large leaves, broad border of gold. Rare. S.
h. emerald gem. Small leaves; very dark green. R.
h. helix. COMMON ENGLISH. Small leaves, very dark green. R.
h. hibernica. Small leaves; glossy. S.
h. japonica. Tri-color; variegated foliage. Small. S.
h. marginata elegans. Leaves small, edged with silver-gold. S

h. Mr.Dr.Polkow. Leaves very small, finely cut. R.
h. regenerianum. Dark, roundish leaves. R.

JASMINE bossonianum. Flrs. deep rose, fragrant. S.

\* officinale. Flrs. white, fragrant R.
\* primulinum. Flrs. yellow; large; leaves large. R.
\* revolutum. ITALIAN YELLOW JESSAMINE. R.
\* simplicifolium. Vigorous. Flrs. white. S.

KENNEDY‘S bimocculata. $1.50.

LONICERA. CREEPING. WILD HONEYSUCKLE. R.
1. chinensis. Strong grower. Leaves reddish; flrs. creamy, fragrant. R.
1. golden leaved. New. S.
1. tupa. Vigorous. Leaves HONEYSUCKLE. Fragrant. R.

MANDEVILLA. Very fragrant pure white flrs. Vigorous. Hardy. R.

MUEHLENBERGIA. A WIRE VINE. Extremely useful as a porch screen. Leaves very small. R.

PASSIFLORA caerulea. PASSION VINE. Flrs. bluish; hardy. R.
p. incarnata. Flrs. white, purple corona. R.
p. manicata. Flrs. red. S.

POLYGONUM baldschuanicum. Strong grower. R.
Large panicles, white flrs. Hardy. S.
p. aubertii. Similar. Leaves reddish. S.

PUERARIA hirsuta. KUDZU VINE. Immense leaves; enormous grower. Perennial. R.

RUBUS ellipticus. EVERGREEN RASPBERRY. Very strong grower; fruit yellow; stems covered with red hairs. Ornamental. Red. 75c.

SOLLYA heterophylla. BLUE-BELL VINE. Hardy. S.
SOLONUM jasminoides. POTATO VINE. Strong grower; flowers lilac in cluster; hardy. R.

TECOMA australis. Flrs. small, foliage dark and glossy.
t. capensis. Flrs. bright orange red. Slender with protruding stamens. T.

VIBURNUM henryi. Vigorous vine, with handsome foliage, dark green, with underside reddish; purplish. R.

WISTERIA. Well known vines, noted for their long pendulous clusters of flrs. Grafted, field grown, or own.
w. multijuga speciosa. Blue flrs.. 4-6 ft. $1.50.
w. m. purpurea. 75c.
w. m. PINK. 75c.
w. dbl. blue. 75c.
w. WHITE. 75c.

ACHILLEA tomentosa. Very dwarfed species with finely cut leaves light green and fluffy, making a carpet; flrs. bright yellow with red. Z.

AQUILEGIA truncata. COLUMBINE. Flower scarlet, tipped with yellow. Q.

ARABIS sarmentosa. ROCK CRESS, 4 in. pots. Q.

ARALIA californica. SPIKENARD. Very large leaves; feathery panicles of white flrs.; likes moist locations, where it grows to 10 ft. 4 and 6 in. pots. Q.

E. sieboldii (FATSIA japonica). 4 in. pots. T.

ARMERIA vulgaris. SEA PINK. THRIFT. Small border plant with bright pink dbl. flrs. $3.00 per 100.

ARTEMISIA telleriana. DUSTY MILLER. 4 in. pots.

ASARUM caudatum. WILD GINGER. Native plant with large, roundish leaves; small white flrs. on slender stem. Useful as a border plant in shady places. 4 in. pots. Q.

ASPIDISTRA lurida. Perhaps the most useful foliage plant for indoor culture. Leaves long, rich green. 4, 6 and 8 in. pots. T.

ASTER. MICHAELMAS DAISY. The native perennial Asters are among the most satisfactory plants to grow in the garden border. Flrs. blue, red, yellow, purple, in spike; from ¼ in. to ½ in. in diameter. Several named varieties.

ASPARAGUS elongatus. ASPARAGUS FERN. A variety with tall, upright stems; red berries. The tall stems are very valuable for decorative purposes, and may be cut frequently. Small plants are very nice for table or window. Highly recommended. 4-6 in. pots. S.

BEGONIA. Bedding varieties. Pink and rose colored flrs. for border or pot culture. Q.

BELLIS Longfellow. Favorite plant for edging low bed; flrs. pink and white. X.

CALADIUM esculentum. ELEPHANT’S EAR. R.

CAMPANULA caerulea. Y.
c. persicifolia. White and blue. Y.
c. rotundifolia. HAREBELL. BLUE BELLS OF SCOTLAND. Flrs. bell-shaped; a beautiful shade of blue. Y.

CHAENOSTOMA hispidum. Small shrub with bluish white, star-like flrs. Very desirable for borders, growing less than 1 ft. high, or for pot or window culture. Q.

CHELONE rosea. Q.

COREOPSIS grandiflora. Flower large yellow, very popular as border plant or for cut flower. Q.
c. e. MARITIMA. SEA DAHLIA. Flr. very large yellow, very handsome and decorative. Q.

CYNARA scolymus. ARTICHOKE. Y.

DIANTHUS. SWEET WILLIAM. Dbl. and single. L.

ERYSIMUM. A really fine winter-blooming perennial for California. Q.
c. californicum. COAST WALLFLOWER. Grows in rather dry places. Flrs. creamy white, in clusters. Z.

FELICIA amelloides. BLUE MARQUISETTE. Shrubby, or a very pretty hot plant. Flrs. blue, with yellow center. Y.

FUCHSIA fulgens. Flrs. large, bright scarlet. 5 in. pots. Q.
f. magellanica. Garden Fuchsias, in variety, blue flrs. with red calyx. Among these are included the globosa, riccartonii, gracilis, cornilla, etc. 5 in. pots. Q.
f. speciosa. Flrs. long, cinnavar-red. 5 in. pots. Q.

GAILLARDIA grandiflora. Large yellow daisy-like flrs. merging to red at base of petals. Y.

GYPSPHYLLA paniculata. Baby’s breath. Q.

HELIOTROPE. Colors lavender, purple, white. Q.

HEUCHERA sanguinea. A rare variety with crimson spikes of flrs. Z.

HOLLYHOCKS. Dbl. red, dbl pink Y.

HUNNEMANNIA furmariaefolia. MEXICAN POPPY. Q.

PERENNIALS — FLOWERING PLANTS

NOTE—All strong clumps from pots where size not specified.

ACANTHUS mollis. Handsome decorative plant for lawn, porch or garden use. Leaves very large; tall spikes of lilac flrs. Plant in rich deep soil fertilized with old manure, and give plenty of water in summer. In 5 and 6 in. pots. Q.

ACTAEA arguta. BANEBERRY. Native of California. R.

ALOYSIA (LIPPIA) citriodora. LEMON VERBENA. 4 in pots. R.
ROSES

Our roses are mostly grown from cuttings, which we find to produce as good flowers and to be quite as vigorous as those budded on wild stock, and there is no trouble with wild suckers from the roots. Only those that will not root from cuttings are budded on other stocks.

"Climbing" only denotes a stronger habit of growth, and such may be kept in bush form by pruning. Mostly field grown; some in 1 gal. cans, for delivery at any time of the year. Prices unless otherwise noted $4.00 per 10.

AENNCHEIN mulleur... POLY. Dwarf; pink.
ANTOINE RIVOIRE. T. H. Creamy-white.
ARTHUR GOODWIN. A. B. Copper-red. 75c.
BABY LYON. P. Coral shaded yellow. 75c.
BABY PHYLIS. P. Carmine pink.
BABY DOLL. H. POLY. Yellow edged pink.
BETTY. H. T. Coppery. Fragrant.
BRITISH QUEEN. Pure white.
BEAUTY DE LYON. A. B. Coral pink.
BLACK PRINCE. H. P. Very dark velvety red.
COUNTESS GOSFORD. H. T. Salmon pink.
CLOTHILDE SOUPERT. H. POLY. Rosy-pink.
CAROLINE GOODRICH. H. P. Light red.
DUCHESS OF ALBANY. H. T. Deep pink.
EDITH PART. H. T. Carmine with chamois flushed red. 75c.
ETOILE DE LYON. H. T. Yellow.
ETOILE DE FRANCE. H. T. Red.
FRAU KARL DRUSCHKI. H. P. White.
GENERAL JACQUEMINOT. H. P. Red.
GENERAL MACARTHUR. H. T. Red.
GEORGE ELGER. POLY. Yellow. 50c.
GLADYS HARKNESS. H. T. Cerise pink.
GEORGE DIXON. H. T. Rich velvety-red. 50c.
GEORGE AHRENS. H. P. Pink.
GRUSS AN D'OR. H. T. Velvety-crimson.
HOOSIER BEAUTY. H. T. Deep crimson, darker shading. 75c.
IRISH ELEGANCE. H. T. Single bronze-red, shading apricot.
IVORY. T. White.
JAMES SPRUNT. Cherry red.
JULIET. H. Austrian J. B. CLARK. H. P. Red.
LA BLANCHE. H. T. Pink.
FRAU JULIET. H. T. Yellow. 75c.
LOS ANGELES. H. T. Coral-pink. $1.25.
METEOR. H. T. Velvety-red.
MAMAN COCHET. T. Light pink.
LADY HILLINGTON. H. T. Yellow. 75c.
SEASHELL. H. T. Coral-pink.
CAROLINE TESTOUT. H. T. Clear pink.
MME. V. Scarlett.
MME. EDMAR HERRIOT. H. T. Terra-cotta or reddish. 75c.
MME. BUTTERFLY. H. T. Salmon yellow. $1.75.
MME. CECIL BRUNNER. F. Bright rose, shaded salmon-pink.
MRS. AARON WARD. H. T. Yellow center, pink edge.
MRS. CHAS. BELL. H. T. Small pink, very distin-
tinct. 75c.
OPHELIA. H. T. Salmon-rose. 75c.
OTHELLO. H. P. Deep crimson. 50c.
PARIS. H. P. Red, maroon. 75c.
PAUL NEYRON. H. K. Pink, largest rose.
PRINCE CAMILLE DE ROHAN. Velvety-red.
QUEEN SCARLET. Y. Clear velvety scarlet.
RADIANCE. RED. Enormous globular flower, dazzling crimson. 75c.
RADIANCE. PINK. Rosy-opaline-pink.
RAINBOW. Deep pink, splashed with Carmine.
REVE D'OR Nois. Golden yellow.
RAGGED ROBIN. T. Deep rose. Semi-doubl and very fragrant.

LEONARD COATES NURSERY COMPANY Inc.

IRIS. DOUGLAS. Native Iris; fls. bluish-purple. Z.
i. LIBERTY. Assorted color. 25c each. $2.00
i. JAN. Assorted color. 30c each. $2.50

KNOPHOFIA aloides. RED HOT POKER. Q.
LANTANA. Very showy. Yellow. Z.
LAVENDER. Lavender. White or lilac flowering. Q.
LUPINUS affinis. Grows best in light sandy soil.
LOBELIA cardinalis. "QUEEN VICTORIA." Dark bronze foliage and brilliant scarlet fls. Y.
MIMULUS cardinalis. SCARLET MONKEY FLOWER. Q.
MORAEA iridoides. Leaves in fan-shaped basal rosettes. Over 8 in. across, white, marked yellow. Q.
MYOSOTIS. "FORGET-ME-NOT." 6-10 in. high. Succeeding best in a sandy, moist situation. Y.

OENOMEA californica. WHITE EVENING PRIM-
ROSE. Z. o. orendsi. Day bloom; fls. pink. Z.
PAPAVER orientale. ORIENTAL POPPY. Y.
p. graecum. HORSE POPPY. Y.
p. indicum. ICELAND POPPY. Y.

PELARGONIUM. GERANIUM. In variety. Q.

PENSTEMON. One of the most interesting and attractive of perennials. The following species being native of California:

p. centranthifolius. Fls. lemon-yellow. Q.
p. cardifolium. Partial climber; leafy; fls. scarlet. Q.
p. carthiifolius. Upright shrub; leafy; fls. scarlet. Q.
p. heterophyllus. Shrub; grows to 5 ft. tall; fls. pink to purplish. Q.
p. heterophylla. "VIOLET BEARD TONGUE." Fls. trumpet shaped, royal purple, marked with pink. Q.
p. labroussii. Scarlet penstemon. Q.
p. palmeri. White penstemon. Q.
p. spectabilis. Blue penstemon. Fls. in long spikes and the richest combination of blue and royal purple. Q.
p. hybrid varieties. Fls. very large, white; white, blue edge; reddish-purple; scarlet; dark magenta. 4-6 in. pots. Z.
PLANT. Choice latest varieties. 30c each; $2.50 per 10. H.

PLUMBAGO. Dwarf. Deep blue fls., exceedingly attractive for borders, or where a rich blue color is needed. Grows erect, less than a foot high. 4-6 in. pot. Q.
VAR. officinalis. ROSEMARY. 4-5 in. pot. Q.
RUDBECKIA laciniata. GOLDEN GLOW. Fls. large, double yellow. 4 in. pot. Y.
SALVIA azurea. Dark blue. 4-5 in. pot. Z.
s. splendens. Crimson. 4 and 5 in. pot. Z.
s. ultra. Blue. 4 and 5 in. pot. Z.

SEA ASTER. Fls. large lilac. Z.

SEDUM. Stone crop; in variety. In pot. Z.
SHASTA DAISY. Q.
SILENE LACINIATA. "INDIAN PINK." Fls. bright scarlet. Q.
SISYRCHIUM californica. BLUE-EYED GRASS. Y.
SOLIDAGO californica. Q.
STOKESIA. STOKES ASTER. Z.
THYME. AROMATIC. Q.
VIOLA. VIOLET.

v. Belle de Chatenay. White, rosy edge. V.
v. Czar. Single white. W.
v. J. Rodenberg. Light blue. V.
v. Mrs. Astor. Violet, tinged red. W.

v. Swanley White. V.
CLIMBING ROSES

AMERICAN PILLAR. Red, single, clusters, magnificent.
BANKSIA. Single white, dbl. white, or yellow.
BARDOU JOB. Single deep red, large.
CHEROKEE. Dbl. white, single white, single pink or single red (Ramona).
CECIL BRUNNER. POLY. Salmon pink.
COQUINA. Bright rosy-pink.
CRIMSON BABY RAMBLER.
DOROTHY PERKINS. POLY. Shell pink.
DIABLO. Single deep red.
DEVONIENSIS. Creamy white.
FRAU KARL DRUSCHKI. P. H. White.
GOLD OF OPHIR. Combination of copper, crimson and salmon.
GARDENIA. Creamy white.
GEN. McARTHUR. Deep red.
GOLD FINCH. White, with gold center.
GRUSS AN TEPLITZ. Deep red.
HOOSIER BEAUTY. H. t. Dark crimson.
LIBERTY. Velvety crimson.
LAMARQUE. Pure white.
LADY GAY. Cherry pink.
MISS G. MESSMAN. Everblooming, crimson.
MARECHAL NIEL. Deep golden yellow, fragrant.
MARCO. White, coppery tinted.
ORIFLAME. Bright red—coppery tinted.
PAUL NEYRON. Pink, large.
PINK BABY RAMBLER.
REINE MARIE HENRIETTE. Crimson.
SWEET HEART. Pink.

SWEET LAVENDER. Soft pink.
SILVER MOON. White.
TAUSENDSCHOEN. Ffrs. in clusters, many shades pink.
VEILCHENBLAU. Blue rose.
WHITE DOROTHY.
WM. ALLEN RICHARDSON. Deep orange yellow.
WICHURIANA. Memorial rose.
WHITE BABY RAMBLER.

CANNAS

We call attention to our splendid collection of Orchid flowering and decorative CANNAS. Price root clumps, 20c ea., $1.50 per 10.

ALLEMANNIA. Orange color, very large, spotted with red. Grows to 5 or 6 ft.
AUSTRIA. Yellow, very large. 3-4 ft.
ALBA ROSEA. A most unusual and lovely canna; frs. small, with stiff narrow petals, the loveliest peach blossom, shading to creamy white. 3-4 ft.
ATLANTA. Orange-red. 5-6 ft.
JOLIET. Rich light red. 5-6 ft.
PILLAR OF FIRE. Glowing light red. 4-5 ft.
CRIMSON BEDDER. Rich scarlet; large; 3-4 ft.
F. BENARY. Fiery orange, yellow edge. 4-6 ft.
GLADIATOR. Yellow, spotted and splashed with crimson.
KARL MERCK. Large, pale yellow, streaked pink at throat. 3-4 ft.
KING HUMBERT. Large, scarlet, often streaked with gold; foliage bronze. 3½ ft.
KING OF BRONZES. Small, red; foliage rich bronze. 6-7 ft.
LOUISE. Large, pink, tinges salmon. 3-4 ft.
LOUISIANA. Deep red. 4-5 ft.
MOONLIGHT. Small creamy white. 3-4 ft.
MUSAFOLIA. Small leaves; foliage dark green, edged bronze. 7-8 ft.

Pennsylvania. Deep crimson; very large. 3-6 ft.
PRICE WEID. Scarlet; yellowish tinge. 5-6 ft.
VENUS. Pink and gold; very large. 3-4 ft.
WM. SAUNDERS. Red, rather small foliage. 3½ ft.

JUST A WORD

FORTY YEARS ago Leonard Coates established this business and is constantly studying, investigating and experimenting to improve our Fruit varieties.

OUR BUD WOOD is cut from bearing trees on our home place at Morganhill. You are invited to see these trees in season and satisfy yourself that the utmost is being done to produce for you the best bearing trees.

THE NURSERY STOCK is grown in some of the best of California's fertile soil—can you ask for more?
As helpful to those of our customers who are not familiar with the names and habits of certain shrubs, trees and vines to produce a given effect, we submit the following lists, with some suggestions. We purposely omit many really tender plants, which, while they may grow well in Southern California for years, will in time, be hurt by frost. Refer to text of catalogue for full description of varieties.

**EVERGREEN SHRUBS**

*(A) WITH BERRIED EFFECTS: TALL GROWING*

Some of these are not truly evergreen, but become practically so in California.

- **EUGENIA MYRTIFOLIA.**
- **HETEROMELES.** Christmas Berry.
- **ARBUTUS MENZIESII.** Madrone.
- **RHAMNUS CALIFORNICA.** Wild Coffee.
- **CRATAEGUS CRENULATA.** Evergreen Thorn
- **CRATAEGUS PYRACANTHA.**
- **COTONEASTER PARVISCHETTI.**
- **COTONEASTER PANNOSA.**
- **ARBUTUS UNEDO.** Strawberry Tree.

*(B) WITH BERRIED EFFECTS: OF MEDIUM HEIGHT*

- **COTONEASTER ANGUSTIFOLIA.**
- **BERBERIS DARWINI.**
- **BERBERIS ELRIGGII.**
- **BERBERIS WILSONAE.**
- **BERBERIS STENOPHYLLA.**
- **BERBERIS AQUIMUN.**
- **NANDINA DOMESTICA.**
- **MYRTUS COMMUNIS.**

**OF LOW OR PROCUMBENT HABIT**

- **COTONEASTER HORIZONTALIS.**
- **COTONEASTER MICROPHYLLA.**
- **COTONEASTER THYMIFOLIA.**

**FOR GROUND COVERS**

The above and—

- **JASMINE PRIMULINUM.** yellow frs.
- **SOLLYA HETEROPHYLLA.** blue.
- **AMELOPSIS SEMPERVIRENS.**
- **HEDERA.** English Ivies.
- **HYPERICUM.** yellow.
- **PLUMERIA CAPENSIS.** blue or white.
- **EVONYMUS RADICANS.**
- **EVONYMUS SIEBOLDI.**
- **HELIXANTHEMUM.** various colors.
- **VINCA.** blue or white.
- **WICHURIANA.** Rose, white.
- **WICHURIANA.** Hybrids, various colors.
- **MESEMBRYANTHEMUM.**
- **HONEYSUCKLE.** in variety.
- **FRAGARIA.** Trailing Strawberry.
- **AMELOPSIS MURALIS.**
- **CONVOLULUS MACRITANICA.**
- **AMELOPSIS ENGELMANNI.**
- **MICROMERIA.** Yerba Buena.
- **LIPPIA REPENS.**
- **LANTANA.** (cut down by frost), various colors
- **CISTUS.** Rock Rose. Crimson, purple or white.

**HEDGES, BORDERS AND LOW GROWING SHRUBS**

- **PRUNUS ILICIFOLIA.** Holly Leaved Cherry.
- **PRUNUS INTEGRIFOLIA.** Catalina Island Cherry.
- **BERBERIS.** Evergreen and deciduous.
- **BOX.** For low, formal borders.
- **CRATAEGUS.** White frs.
- **CYPRESS.** For tall hedges.
- **DIOSMA.** Neat hedge.
- **ERICA.** Low border, cold climate.
- **EVONYMUS.** Strong hedge, sunshine.
- **LIGUSTRUM.** Neat hedges, everywhere.
- **PUNICA.** Pomegranate. Very attractive hedge, scarlet or white frs.
- **SALVIA.** In variety.
- **VERONICA.** In variety.
- **LONICERA.** Hall’s, or Native Honeysuckle.

**MYRTUS.** Myrtle.

- **PHOTOSPORUM.** Several varieties, rather tall.
- **CEANOTHUS.** Blue firs; very good strong hedge.
- **CISTUS.** In colors.

All these may be kept trimmed into any shape.

**CONIFER BEARING TREES**

- **CEDAR DEODARA.** Large, bluish foliage.
- **CEDAR ATLANTICA.** Tall, symmetrical.
- **CEDAR OF LEBANON.** Dark, spreading.
- **CYPRUS ARIZONA.** Bluish foliage.
- **CYPRUS MONTIFIC.** Purple. Rich green.
- **PINE MONTEREY.** Fast grower.
- **PINE SCOTCH.** Tall.
- **PINE YELLOW.** Very large tree.
- **SPRUCE DOUGLAS.**
- **SPRUCE BLUE.**
- **SPRUCE NORWAY.** For Christmas trees.
- **CRYPTOMERIA JAPAN.** Redwood.
- **SEQUOIA SEMPERVIRENS.** Coast Redwood.
- **SEQUOIA GIGANTEA.** Big Tree.

Many more species, for more or less individual planting, and in the same class.

**TORREYA CALIFORNICA.** California Nutmeg Tree. Dark green.

**CASUARINA.** Sparsely, light growing foliage.

These two, similar in general appearance may be classed with the Conifers.

**DECIDUOUS SHRUBS FLOWERING**

All of these should be pruned well after flowering.

- **SPIREAS.** White or pink.
- **DIERVILLA.** White, pink, or crimson.
- **AESCLULUS.** White.
- **ALTHEA.** White, pink or purple.
- **AMORPHA.** Pink flowers.
- **BERBERIS THUNBERGII.** Crimson berries.
- **BERBERIS VULGARIS.** Crimson berries.
- **BERBERIS VULGARIS.** PURPUREA, purple foliage.
- **CERCIS.** Rose color.
- **COLUTEA.** Red.
- **CAESALPINIA.** Yellow and red.
- **FORSYTHIA.** Yellow.
- **KERRIA.** Yellow.
- **CRAPE MYRTLE.** Pink, rose, and white.
- **MALAVISCUS.** Scarlet.
- **PHILADELPHUS.** White.
- **RHUS COTINUS.** Pink.
- **SYMPHORICARPUS (WAX MYRTLE).** White and red.
- **SALVIA GREGGII.** Crimson.
- **SALVIA GREGGII ALBA.** White.
- **SOLANUM XANTH.** Blue.
- **STYRIGA.** White, lilac and purple.
- **TAMARIX.** Pink.
- **VITEX.** Blue.
- **CARYOPTERIS.** Blue.
- **PRUNUS TOMETOSA.**

**EVERGREEN SHRUBS FLOWERING**

- **ESCALLONIAS.** Red or white.
- **CORONILLA.** Yellow.
- **CEANOTHUS.**
- **ACACIA CULTIFRORUM.** Yellow.
- **ACACIA VERTICILLATA.** Yellow.
- **ACACIA HISPIDA.** Yellow.
- **ACACIA ARMATA.** Yellow.
- **ACACIA FARNESIANA.** Yellow.
- **BUDDLEIA.** Lavender, white, or yellow.

OLEAERANDER. Crimson, pink and white.  
PITTOSPORUM PHYLLOIDES. Yellow.  
POLYGALA. Mostly white.  
VERONICA. Blue, purple, white.  
HAKEA. Mostly white.  
CHOISYA. Mexican orange; white.  

EVERGREEN SHRUBS FOLIAGE EFFECT  
EVONYMUS JAPONICA. In variety.  
PITTOSPORUM NIGRICANS.  
LAUREL (PRUNUS CERASUS).  
LAUREL CALIFORNIA. (COAST REGION).  
LAUREL SWEET BAY.  
AUCUBA.  
BOX TREE.  
LIGUSTRUM.  
CAMPHOR.  
ERIBOTRYA. Loquat.  
PHOTINIA SERRULATA.  

DECIDUOUS SHRUBS AND TREES: FOLIAGE EFFECT  
PRUNUS PISSARDI. Purple Leaved Plum.  
BERBERIS PURPUREA. Purple Barberry.  
ACER. Maple.  
PYRUS MALUS NEIDWESKIANA.  
SAMBUCUS AUREA.  

ORNAMENTAL TREES, EVERGREEN: FLOWERING  
ACACIA. In large assortment, yellow.  
Sтеркула. White.  
ARBUTUS. Madrone.  
EUCALYPTUS SIDERoxyL-ROSEA. Pink flowers.  

PLANT YOUR TREES PROPERLY  
This illustrates a Fruit Tree properly planted. Note the size and shape of hole and spread of roots at convex bottom. In a general way, observe the following. Dig holes at least 2½ ft. wide by 2 ft. deep. Fill in with loose moist top-soil and press well below and around roots. Plant no deeper than tree stood in Nursery. Do not cut to less than 30 inches in height. Leave some laterals where possible. Caution! Never let roots get dry.

EUCALYPTUS LEUCOXYLON-ROSEA. Pink flowers, both hardy.  
EUCALYPTUS PICIFOLIA. Crimson flowers, rather tender.  
GREVILLEA ROBUSTA. Orange-red.  
HAKEA LAURINA. White.  

ORNAMENTAL TREES, DECIDUOUS  
KOELREUTERIA PANICULATA. Nothing more beautiful. See description.  
ACER. Maples.  
LOCUST. Pink and crimson flowers.  
CHILOPSIS. Mimbres.  
FRAXINUS. Arizona Ash.  
PLANE.  
OAKS. (Evergreen and deciduous).  
SORBUS. Mountain Ash.  
LARCH.  
LINDEN.  

VINES  
Among the quickest growing vines are:  
PASSIFLORA. Passion Vine.  
BOUSINGAULTIA. Madera Vine.  
COBOEA SCANDENS.  
DOLICHOS, Australian Pea Vine.  
JASMINE OFFICINALE.  
HEDERA. English Ivy.  
LONICERA. Hall's Japanese Honeysuckle.  
MUEHLENBECKIA.  
WISTERIA.  
VITIS HENRYI.  
AMPELOPSIS QUINQUEFOLIA.  
BIGNONIA CHERERE.  
BIGNONIA VIOLACEA.  
BIGNONIA TWEEDIANA.  
MANDEVILLA.  

These lists are but partial, and, with hardly an exception, unless so noted, include varieties that will succeed almost anywhere in California; in partial shade or in full sun.

EVERGREEN TREES  
An Evergreen Tree properly planted. Dig hole as for a Fruit Tree; ball unbroken and fine earth pressed firmly below and around ball. Fill in of coarser earth and mulch of old manure in Basin.
**EXPLANATION OF SCHEDULE OF PRICES**

You will note that each variety among our ornamentals is followed by a letter, viz: A, G, N, etc. These letters refer to our new price schedule. For instance, after the description of Catalpa bungei, you will find the letter “N.” Referring to this schedule you will find “N” 5-6 ft. priced $2.00 each and $18.00 per 10. Likewise Fraxinus americana, White Ash, if followed by “L,” and has a range from 4-8 feet. You will find under “L” 4-5 ft. 70¢ each and $6.90 per 10, 5-6 ft. 80¢ each and $7.20 per 10, and so on.

</tbody>
</table>
It is well known to every prune grower in California that there is great variation in size, quality and time of ripening of the ordinary French prune in the same orchard, and under precisely the same conditions. Leonard Coates realized this in 1882, but planters paid no attention to the statement. Since then, and during the past few years more particularly, some growers have concluded that such variation does exist, and were desirous to get trees that would produce a uniformly large prune. For the past 13 years we have been propagating what we called "Coates Pedigreed French Prunes," the buds having been taken from certain "recorded" trees.

We now propagate only three types or varieties, which, in the second and third generations, have proved true to type. These we call "Coates French 1401", "Coates French 1403", and "Coates French 1418." The first two are of what growers generally recognize as "the large French prune", pear shaped and uniformly large. The third is propagated from a branch or a French prune tree which bore extra large fruit, and of different shape, although the same in quality and sweetness. Dried, it makes a uniformly 30-40 prune. This season our whole crop of "Coates French 1418" ran 25-30, while the other two were a 40-50 grade. It ripens as early as the earliest. It has been in bearing for over 12 years. These three French prunes and several others are in bearing in same orchard and were investigated by a special committee of experts, local and official, on Aug. 21, 1919, appointed at the last Fruit Growers Convention at Riverside.

Our advice to the practical grower would be to plant "Coates French 1418" alternate with one of the others; there is always a chance then of better pollination with the aid of bees, when different trees of the same species are in close proximity. A flower may be either "self-fertile" or "self-sterile," but there are many degrees between these two extremes.

LEONARD COATES NURSERY CO.
Two types of our prunes: Coates (French) No. 1418, the largest drying about 30 to the pound, and Coates (French) No. 1403, bearing a heavier crop, but smaller prunes.
OLEANDERS
